

We're Proud of It

The Daisy 1908 Model

embodying the same general principles that made it famous, yet more attractive looking than ever, over

30,000

in active service, of one make of boiler, means that the Daisy has been accorded a **recognition and prestige** unattained by any other boiler.

The Best is None too Good

You cannot afford to experiment with "just as good's," "will do the work as well," etc., etc., there isn't any argument, that can stand against a record such as the "Daisy's." Think of it! Over 30,000 in active service.

It Stands in a Class by Itself
