

Driven to the Wall by Competition!

Many a man in these days is absolutely forced out of business for no other reason than that he unwisely refuses to throw out old machines that are still in working order to put in new machines which his competitors use to reduce their cost of manufacture hundreds and thousands of dollars.

The Falls Continuous-Feed Glue Jointer

will save you \$500 to \$1500 a year for every machine you put in and pay for itself at the outside within a year. It is used in hundreds of the largest and most up-to-date woodworking shops in America, and its value is PROVED BEYOND A QUESTION.

Would you like to have us PROVE IT TO YOU? We'll do it cheerfully—show you the figures in your own case if you will give us data.
