

PUERTO RICO COMMUNIQUE

The heads of state and government of Canada, France, the Federal Republic of Germany, Italy, Japan, the United Kingdom of Great Britain and Northern Ireland and the United States of America met at Dorado Beach, Puerto Rico, on the 27th and 28th of June, 1976, and agreed to the following declaration:

1. The interdependence of our destinies makes it necessary for us to approach common economic problems with a sense of common purpose and to work toward mutually consistent economic strategies through better cooperation.

2. We consider it essential to take into account the interests of other nations. And this is most particularly true with respect to the developing countries of the world.

3. It was for these purposes that we held a broad and productive exchange of views on a wide range of issues. This meeting provided a welcome opportunity to improve our mutual understanding and to intensify our cooperation in a number of areas. Those among us whose countries are members of the European Economic Community intend to make their efforts within its framework.

4. At Rambouillet, economic recovery was established as a primary goal and it was agreed that the desired stability depends upon the underlying economic and financial conditions in each of our countries.

5. Significant progress has been achieved since Rambouillet. During the recession there was widespread concern regarding the longer-run vitality of our economies. These concerns have proved to be unwarranted. Renewed confidence in the future has replaced doubts about the economic and financial outlook. Economic recovery is well under way and in many of our countries there has been substantial progress in combatting inflation and reducing unemployment. This has improved the situation in those countries where economic recovery is still relatively weak.

6. Our determination in recent months to avoid excessive stimulation of our economies and new impediments to trade and capital movements has contributed to the soundness and breadth of this recovery. As a result, restoration of balanced growth is within our grasp. We do not intend to lose this opportunity.
