J.P. Jacob,
Executive Vice President

The Saunette, a portable steam bath manufactured by Sauna Magic, is a sturdy fibreglass unit, weighing only 37 kg (82 lbs.). It can be used inside or outside the home. The unit needs neither plumbing nor special wiring and is extremely energy-efficient (using less than 10¢ worth of electricity per hour). Saunette is moveable on two built-in polypropylene wheels. Because of its handy size 27½ inches wide by 36 inches deep by 48 inches high (79 cm by 97 cm by 116 cm) it passes through any standard door and can be stored even in a closet. An adjustable cedar seat gives off a pleasant fragrance while the unit is in operation. Steam is produced by pouring water into the steam generator.

Saunette is C.S.A. approved and is manufactured in 110 and 220 voltage.

Presently, the colours grey, ivory and red are offered. Any additional shades may be added to keep up to date with fashion changes.

Savu Sauna Products Ltd. has a 40 000 square foot plant, showroom and head office in Waterloo, Ontario where it manufactures and distributes pre-built saunas, sauna heaters and sauna kits for the North American market.

The Savu pre-built sauna kit can be assembled easily in just a few hours. No plumbing, floor drain, nor special venting is required. The ceilings and walls are built entirely of solid 2 inch by 4 inch (50 × 100 cm) tongue-and-groove logs of western red cedar. It requires no further insulation and is completely finished inside and out. Solidly free-standing, it needs no supports. The four walls are joined in a unique interlocking system that automatically squares itself to create a strong and rigid unit. All logs interlock

together inside the corners with long metal rods. When all walls are in place, they are compressed using the four corner rods to eliminate any gaps and provide a "sauna pressure-seal". The wood mouldings on the outside corners complete the "all-cedar" look.

All sizes are available from 4 foot (1.23 m) by 5 foot (1.53 m) to 10 foot (3.0 m) by 12 foot (3.7 m).

Operating under the brand name "Homecraft Saunas", Spincraft Manufacturing Corporation has been manufacturing saunas, sauna heaters and sauna accessories since 1981.

The sauna product line consists of precut kits of kiln dried red cedar in all sizes and plans for 5 foot by 6 foot (152 cm by 183 cm) and 6 foot by 8 foot (183 cm by 244 cm) sauna rooms.

Sauna heaters are available in 4 and 5 KW sizes for corner or wall mounts, 5, 7.5 and 9 KW sizes for wall mount

only, and the larger 12 and 15 KW models for floor mounting. These sauna heaters will heat sauna rooms from 100 to 900 cubic feet in size. The product line also includes a range of sauna controls, timers and a 24 hour control for commercial installations, plus a full line of sauna accessories from buckets and ladles to eucalyptus oil.

The sauna heaters feature stainless steel construction and a unique continuous free flow design for air circulation.
