where:

A =   the support provided by the federal and
provincial governments to producers of
barley through the NISA for that
calendar year

B =   the support provided by the federal and
provincial governments through the NISA
for that calendar year

C =   cash receipts of barley for that
calendar year

D =   total cash receipts of all eligible
commodities under the NISA for that
calendar year.

I also have the honour to propose, pursuant
to paragraphs 5 and 6 of the Annex, that our
Governments agree to include under Schedule 2 "Canadian
Government Support Programs", Part B "Other Support",
of the Annex the following programs and agreed-to-
methodology:

10.1 Payments Pursuant to the Cash Flow
Enhancement Program (CFEP)

The support provided by the federal
government to producers of barley through the CFEP
is the total amount paid to producers of barley
for that crop year. The support is computed in
accordance with the following formula:

$$A = \left(B_i * \frac{C_i}{D_i}\right) + \left(B_{ii} * \frac{C_{ii}}{D_{ii}}\right)$$

where:

$A =$ the support provided by the federal
government to producers of barley
through the CFEP for that crop year

$B_i =$ the interest cost of the funds
advanced to producers of all
eligible crops under the Prairie
Grain Advance Payments Act for that
crop year
