

## ANNEX

Terms and Conditions governing the establishment, maintenance and operation of four OMEGA Navigation System Monitoring Stations in Canada.

### 1. *Cooperating Agencies*

The project shall be conducted by cooperating agencies designated by each Government. On the part of the Government of the United States of America the cooperating agency will be the United States Coast Guard, (hereinafter referred to as U.S.C.G.) and on the part of the Government of Canada the cooperating agency will be the Canadian Coast Guard, (hereinafter referred to as C.C.G.). Either Government may change the designation of its cooperating agency by means of a notice in writing to the other Government.

### 2. *Site Selection*

The C.C.G. will select four sites for the OMEGA monitoring stations at, or in the vicinity of, Inuvik, Northwest Territories; Resolute, Northwest Territories; Frobisher, Northwest Territories; and St. Anthony, Newfoundland. Location of the antennae and equipments at the selected sites will be the responsibility of the C.C.G. with the concurrence of the U.S.C.G.

### 3. *OMEGA Monitoring Electric Equipment*

The U.S.C.G. will: (a) furnish all electronic equipment and spare parts necessary to maintain and operate the OMEGA monitoring stations, including all required magnetic cassette recording tapes; (b) retain title to all equipment and parts; (c) ship the equipment and parts to the sites provided and bear all shipping costs; (d) provide technical assistance and supervise the installation of the receivers, recording devices and whip antennae; (e) repair any power supply, comparator, programmer and receiver modules (or equivalent equipment) requiring major repair. Such components will be returned to the U.S.C.G. at its expense when repair is required. Components such as light bulbs, recorder pens, etc., may be replaced and minor repairs may be accomplished by C.C.G.

The U.S.C.G. reserves the right to substitute new equipment, which will ease the data collection process, for equipment originally installed. The U.S.C.G. will provide 30 days advance notice of such substitutions.

### 4. *System Operation*

The C.C.G. will:

- (a) provide qualified technical personnel necessary to maintain and operate the OMEGA monitoring equipment,
- (b) provide minor on-site routine servicing, including changing magnetic cassette tapes at proper intervals and forwarding the tapes to the U.S.C.G. not less frequently than monthly,
- (c) requisition replacement components for repair of defective equipment. U.S.C.G. personnel will visit the monitoring stations during the installation stage and may thereafter visit the stations for operational, maintenance, training and liaison purposes. Canadian personnel may similarly visit U.S.C.G. facilities for familiarization, training or liaison as required.
