THE
CONTEMPORARY SCIENCE SERIES.

EDITED BY HAVELOCK ELLIS.

*Most of the Volumes will be illustrated, containing between
300 and 400 pp. Others to follow at short intervals.*

THE CONTEMPORARY SCIENCE SERIES will bring within general reach of the English-speaking public the best that is known and thought in all departments of modern scientific research. The influence of the scientific spirit is now rapidly spreading in every field of human activity. Social progress, it is felt, must be guided and accompanied by accurate knowledge,—knowledge which is, in many departments, not yet open to the English reader. In the Contemporary Science Series all the questions of modern life—the various social and politico-economical problems of today, the most recent researches in the knowledge of man, the past and present experiences of the race, and the nature of its environment—will be frankly investigated and clearly presented.
