

Page 109.—Section 135. This should be read giving results only, thus :

20, 14, 8, 13. 7, 19, 13, 9. 13, 7, 15, 6, 20.
20, 13, 7, 16, 4. 4, 13, 19, 8.

Section 136.—First column may be read :

20 equals 18 plus 2.
18 equals 2 times 9.
20 equals 12 plus 8.
12 equals 4 times 3.
15 equals 14 plus 1.
14 equals 7 times 2, etc.

Section 137.—Second column may be read :

18 equals 5 plus 13.
15 divided by 3 equals 5.
19 equals 7 plus 12.
14 divided by 2 equals 7.

Section 140 introduces problems in partition.

Example 1.

Analysis :

Have the problem read several times.

TEACHER.—“What are we asked to find?”

PUPIL.—“The value or cost of 1 apple.”

Teacher writes as indicated below.
