TORONTO

THE WEATHER

Observatory, Toronto, March 9.—(3 p.m.)—Pressure is highest tonight over the south Atlantic states and relatively low over the western part of the continent. A few light falls of snow or rain have occurred today in southern Ontario, elsewhere in Canada the weather has been fair and for the most part quite mild.

Minimum and maximum temperatures: Toronto, 18 below-10; Prince Rupert, 46; Victoria, 40-50; Kamloops, 36-54; Calgary, 26-50; Edmonton, 14-32; Banff, 10-33; Prince Albert, 14-32; Moose Jaw, 21-45; Winnipeg, 6-32; Port Arthur, 6-28; Sarnia, 2 below-33; London, 26-4; Toronto, 23-35; Kingston, 26-38; Ottawa, 10-34; Montreal, 18-33; Quebec, 14-28; St. John, 18-32; Halifax, 20-38.

Lower Lakes and Georgian Bay—A few light showers of sleet or rain, but mostly fair and quite mild.
Ottawa Valley and Upper and Lower St. Lawrence—A few light falls of snow or rain, but mostly fair and mild.
Gulf and North Shore—Higher temperature.
Maritime—Moderate to fresh southwesterly to southerly winds; fair and mild.
Superior—Generally fair and mild.
All West—Fair and mild.

GAS, COAL AND OIL THRUOUT DOMINION

Alberta Could Supply All Coal Canada Needs, Says J. T. Stirling.

MINES UNDEVELOPED

The proceedings of the second day's session of the Canadian Mining Institute held yesterday at the King Edward, proved no less interesting than its predecessor. The principal subjects of discussion were coal, gas and oil as affecting both the Dominion and Ontario. J. T. Stirling, speaking on the coal mining industry in Alberta, said the mines in that province were only running 50 per cent, and such being the case, it was impossible to produce coal at a minimum cost. To do this the mines must be run evenly and the miners kept working steadily. Since 1905, declared Mr. Stirling, 60 new mines had been opened in Alberta, of which only 275 were now in operation. This meant that there was a total loss of 26,000,000 tons of coal. If Canadians, said Mr. Stirling, would develop their own resources, Alberta in a few years could supply all the coal requirements of the Dominion.

Perhaps the paper of most public interest was that delivered by M. A. McNeill, on "Coal Transportation." Mr. McNeill said Canada imported from the United States last year 4,782,000 tons of anthracite coal; and 17,275,000 tons of bituminous coal; or just one-half of the requirements of the Dominion. In this latter class of coal Canada requires 22,000,000 tons yearly, or about 60,000 tons per day. When the total Canadian consumption of coal was 35,000,000 tons, or about four and a half tons per capita. When our population reaches, as it should in 1925, to the number of 10,000,000 people, Canada will require 44,000,000 tons of coal yearly, declared the speaker. Unless the home output increases in the meantime, we shall then have to import 27,000,000 tons yearly, or 74,000 tons daily. Coal is imported to Canada in three ways, said Mr. McNeill—42 per cent. is water-borne, 46 per cent. comes by rail, and 12 per cent. by ferries. These ferries are found on Lakes Ontario and Erie, and handle 2,000,000 tons yearly.

Should Be Prepared.
We should always be prepared for abnormal conditions, said Mr. McNeill, as owing to the great difficulty of importing coal by rail thru the Niagara gateway, where the Canadian railways are unable to accept freight in the large quantities delivered by the United States railways, he thought both Toronto and Hamilton should store up coal by water and store it against a rainy day. Buyers should store bituminous coal, he contended. In the past they had not done this, but lived almost from hand to mouth. Mine prices for coal had practically the same throughout the year, and therefore, there was no inducement for the buyer to buy a state of things like this, contended Mr. McNeill, meant a lot to the railroads, as tonnage that might be hauled during the summer, when traffic was not so heavy and operating costs and general conditions were more favorable, is left over and thrown on the railways in the fall and winter months, when the heavy harvest and other weights have to be moved, and sooner or later must bring the efficiency of the railroads, rolling stock and terminals to their lowest point. The remedy for all this, according to Mr. McNeill, is to educate the buyer to the fact that it is to his interest to take delivery of his coal as early as possible during the summer months. "Store coal early in the summer," he declared Mr. McNeill, in conclusion of his address.

Ontario Oil Fields.
"Canada produces only 0.08 per cent of the world's production of petroleum, and Ontario contributes the greater part of that," declared Dr. M. Y. Williams, in his address on "Future Prospects of Oil Gas Production in Ontario." During 1918 the Dominion produced 304,741 barrels, which was the greatest output since 1910. Of this Ontario contributed 288,922 barrels, or 94.8 per cent, and New Brunswick 3000 barrels. The value of the whole production was \$74,677. Against this the value of imported oil was \$29,851,196. Survey this shows," said Dr. Williams, "that Canada ought to try and increase her output."

Dealing with the scientific side of oil, Dr. Williams said five geological formations in Ontario have produced petroleum in commercial quantities—the Trenton, the Medina, the Guelph, the Silina and the Onondaga. It was these formations, said the doctor, which had placed Ontario on the map as a petroleum producer. The wells on these formations have produced 388,922 barrels of oil. During 1918 the Dominion produced 304,741 barrels, which was the greatest output since 1910. Of this Ontario contributed 288,922 barrels, or 94.8 per cent, and New Brunswick 3000 barrels. VETERANS

Items of Interest to Returned Soldiers Will Be Read in This Column if Phone or Sent In.

MANITOBA G.W.V.A. DEBATES PENSIONS

Favors Pension at Rate of One Dollar for Each One Per Cent. Disability.

FOLLOW ALBERTA

Veterans in Other Prairie Province Also on Record Along Same Line.

Winnipeg, March 9.—Pensions at the rate of one dollar for every one per cent. disability were asked for at the annual provincial convention of the Great War Veterans' Association held here today. A vigorous protest was registered against the deductions that are now being made from widowed mothers' pensions.

The pensions resolution was introduced in the form of a telegram from C. G. MacNeill, Dominion Secretary, Ottawa, who asked for the views of the convention on the following:

"The resolution of Alberta command advocates increase of pensions to rate of \$1 for every one per cent. of disability, equalizing the pensions, irrespective of rank, thus one hundred per cent. disability would receive \$100 per month, and fifty per cent. disability \$50 per month. Please obtain and wire opinion of your command on this proposal. Advise also opinion on deductions now made from widowed mothers' pensions."

Soldier Settlement.
Complaints against the administration of the soldier settlement board are being rapidly cleared away, according to the report of the agricultural committee.

The committee was directly traceable to the lack of co-operation between the board and the settlers. The board's lack of making of valuations by the board, and carelessness in the handling and filing of documents which should have received immediate attention.

The committee recommended that the local advisory committee should be given sufficient latitude to deal with ordinary cases without having to refer them to Ottawa. The returned soldiers, however, are not to be left in the lurch. Additional officers be appointed, one in the northern and one in the western part of the province, to deal with the system of holding for soldiers' homesteads, grants, etc., is the cause, in the opinion of the committee, of the dissatisfaction and should be abolished.

WANTED IN COBURG ON FORGERY CHARGE

Cornwall, March 9.—(Special.)—A young man, who arrived in town a few days ago, and registered under the name of Nelson Wilson, at the soldiers' civil relief office, was arrested by the Chief Snyde today at the Cornwall M.P.'s and some of the cabinet ministers, and I am convinced that the Calgary resolution is but a mere change of being put thru the house of commons.

"I have already debated this question with those who know most about it as well as those who have it in their power to make it law, and I am convinced that the Calgary resolution is but a mere change of being put thru the house of commons."

Wilson, who is a returned soldier, will take him back to Cobourg to face the charge.

APPOINT A VETERAN.
Woodstock, Ont., March 9.—(Special.)—William Skinner, a local veteran of the First Battalion and was wounded in France, has been appointed the new civil relief officer, the new position recently created by the city council.

STREET CAR DELAYS

Tuesday, March 9, 1920.
King cars, both ways, delayed 15 minutes, at 9:43 a.m., at Riverdale crossing, held by train.
Bathurst cars, both ways, delayed 8 minutes at 6:50 a.m., at Front and Spadina, held by train.

Bathurst cars, both ways, delayed 8 minutes at 12:35 p.m., at Front and John, held by train.
Bathurst cars, both ways, delayed 8 minutes at 5:45 p.m., at Front and John, held by train.

King cars, both ways, delayed 6 minutes at 6:35 p.m., at Front and John, held by train.
King cars, both ways, delayed 6 minutes at 6:35 p.m., at G.T.R. crossing, held by train.

King cars, both ways, delayed 6 minutes at 2:29 p.m., at G.T.R. crossing, held by train.
Avenue Road and Dupont cars, westbound, delayed 8 minutes at 4:19 p.m., at Wellington and Scott, held by wagon on track.

The west was to bore, and this should be undertaken by the government before private enterprise was asked to come in. Mr. Dowling thought the centre of the oil basin of the west was at Fort Simpson.

"Brigetting" as a new coal scheme was dealt with by E. Stansfield, who said that for years past practically all coal screenings had been dumped into rivers, but now methods had been discovered and adopted to use these screenings. It was the intention of certain companies, he said, to dredge the rivers and reclaim what had previously been thrown away.

The delegates to the convention were entertained to luncheon yesterday by the city, the mayor being in the chair.

Today's Agenda.
The most interesting subjects in agenda for today are an address by J. A. Campbell, M.P., on "The Attitude of Canadian Governments Towards Mining Development," and an open discussion of the nickel coinage question. The annual dinner of the association will be held at the King Edward this evening.

The delegates and their friends spent last evening at a smoking concert held in their honor in the Pompano room of the King Edward. The office of chairman was shared between G. G. S. Lindsey and Colonel G. S. Periale. Some two hundred of the visiting delegates listened to a delightful and diversified program.
