BY AUCTION AT SALES-ROOM, 96 Germain Street, on TUESDAY AFTERNOON, the 26th inst., at 3 o'clock.

F. L. POTTS, Auctioneer.

SOLD WATER FOR WHISKEY.

Philadelphia is Accused of Using Slight-of-Hand on Hotelkeeper.

Philadelphia, Sept. 25—George Jose of this city was held in \$8,000 bail today by Magistrate Coward for the next term of court in Lackawanna County to answer a charge of having sold a barrel of water, purported to be whiskey, to a Pottsville hotelkeeper for \$600.

Jose is alleged to have used a bit of slight-of-hand when he allowed the hotelkeeper to sample the "whiskey." Instead of syphoning a drink from the barrel he is said to have syphoned it from a bottle in his coat pocket by means of a rubber tube running through his sleeve.

Warning to Investors

Don't buy Industrial, Mining or other shares without first obtaining authoritative information.

Canada is now on the verge of one of the greatest gold mining booms in the world.

NEW GOLD mining properties, fabulously rich, are now being opened up in Canada. The gold content of the DOUGLAS IN PROSPERITY (Shareholders) is being estimated at 100,000,000 ounces. Other companies will be listed upon invitation by unscrupulous promoters, that may be worthless stock-picking schemes.

Investigate before investing.

—not after—

Present yourself against "false" stock by reading the Canadian Investors Review.

FALSE FLOOR FOR SMALL ARTICLES SOLVES DISPLAY DIFFICULTIES

What's a store to do when it has only one display window which must be made to contain two entirely different kinds of goods that need very different display effects, so far as the physical appearance of the space is concerned?

Of course, there are a number of make-shift devices which might be used, but, at best, these do not carry the sales-appeal that would be inherent in a window designed especially for either type of goods.

This is the problem which the Premier Electric Distributing Company of Denver, Colo., has faced for some time past. The lines handled by the store may be divided into two principal classes—electric washing machines and other bulky apparatus which takes up a good deal of room, and smaller articles like toys, pens, stationery and the like which are two or three feet above the regular level of the flooring.

Like other stores which have had to wrestle with this problem, the Premier Company adopted the policy of placing the larger articles on the floor of the window space and then used tripods, stands and small tables for the display of the electric fans, irons, toasters and other portable household appliances. The resultant cluttered appearance, however, attracted the attention of the manager, who decided that they usually passed along and bought neither.

"Something's got to be done about this," declared the manager of the company, "we'll have to work out some method by which the big pieces can be shown by themselves—and the same thing applies to the smaller articles."

"How're you going to do it when you have only the single window space?" the manager was asked, particularly when that window isn't large enough to divide? If you had two windows, it would be merely a matter of building a floor two or three feet above the original one and use that for the display of the

The problem of using one window to display bulky articles at approximately the level of the store itself, while smaller appliances are raised to the point where they make the strongest visual appeal, has been solved by the Premier Electric Distributing Company, of Denver, through the use of a false floor that can be slipped into place at a moment's notice.

The remark about the "secondary flooring," however, gave the necessary clue to the whole affair. Why not utilize a "false floor" which could be slipped into place only when the small goods were to be displayed and then removed when the company desired to call attention to the washing machines, electric irons, and other bulky apparatus? The exercise of a little ingenious carpentering showed that the idea was entirely practicable and now the Premier Company has a quickly removable floor that has a marked effect in improving the sales of both types of electric appliances.

How The False Floor is Made.

The permanent display floor is eight inches above the level of the store floor and this is used for the large articles only. The false floor calls for the following parts:

Two rear supports, half the width of the window at the back. These are sixteen inches high and are constructed by taking two one-inch boards six inches wide and the length of the support, nailing these, top and bottom, to several upright pieces of two-by-four stock.

A front support is secured by using a board attached horizontally to the window, its upper surface level with the top of the rear supports. Several holes are bored in this support from above.

The bases of the false floor are skeleton frameworks of an inch stock, each shaped to occupy half of the window floor space. In position, they rest on the front and rear supports. Small holes are bored in them at the front to correspond with the holes in the support and large nails are slipped into these in order to make the framework secure.

Two pieces of diamond-shaped inlaid linoleum, each piece exactly one-half the size of the display window, divide the latter by a line running from front to rear.

This false floor can be put up or taken down in very little time or, if desired, one-half the window can be at the level and the other half at the false-floor level.

"The arrangement," declares the manager of the store, "has completely solved our display difficulty and its value has been reflected in the materially increased sales which have been

The BROCK Hat

MADE IN BROCKVILLE, CANADA.

THE WOLTHAUSEN HAT CORPORATION, LIMITED

To Holders of Five Year 5 1/2 per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5 1/2 per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1st interest cheque as usual. Holders of coupon bonds will detach and retain the last unexpired coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.
