THE SEMI-WEEKLY TELEGRAPH, IST. JOHN, N. B. APRIL 19, 1902.

### DALHOUSIE.

Dalhousie, N. B., April 19.—Premie Tweedie has sent instructions to take all necessary precaution to stamp out smallpox. Dr. Fisher, secretary of the provincial board of health, was here Thursday and met the officers of the county board of health and completed all arrangements with Dr. G. G. Ferguson, the chairman, to prevent the disease from spreading. Your correspondent is informed Friday that 20 houses were under quarantine in the parish of Dalhousie with a competent

gie McGorman, Effie McLean, Mrs. Carn-gie McGorman, Effie McLean, Mrs. Carn-wath, Mr. Trueman, H. F. Wry, Dr. Chap-man and others. Mrs. G. D. Prescott sang Comin' Thro' the Rye. Miss Laura Bray read a very interesting paper en-titled Robert Burns, a Fragmentary Sketch. The society has quite a nice library. Much credit is due Mr. and Mrs. Sketch. The society has quite a mee library. Much credit is due Mr. and Mrs. Geo. D. Prescott for generous donations of money and books. The present officers are: W. A. Trueman, president; H. F. Wry, vice-president; Miss Maggie McGorman, treasurer; Miss Effie McLean, librarian; Miss Laura J. Bray, secretary. The name of the seaman drowned at Hopewell Cape on Tuesday was not Sullivan, as stated, but Martin. His companion, who was rescued, is named Sullivan. Hopewell Hill, April 20—It is said that the Albert mones property, for some years owned by Capt. H. A. Calhoun, has been sold to John L. Peck, banker and lumber merchant, of Hillsboro, and J. Nelson Smith. The property consists of the old Albertite mine, buildings, etc., including a church and 1,400 acres of timber land. Dr. J. T. Lewis, of Hillsboro, was down this week attending Mrs. C. LeB. Peck, who has been quite ill.

Mrs. Smithers, sr., and her daughter, Miss Maisie Smithers, who have been residing at Riverside, have removed to Halifax.

Men are in great domand for work of all kinds, and wages are exceptionally good.

all kinds, and wages are exceptionally good

Mr. and Mrs. Enoch Steeves, of Elgin, are visiting their daughter, Mrs. C. N. O'Rogan, at this place.

Alexander Rogers is having a new crane erected at his stone quarry, on Grindstone Commissioners Smith, Tingley and Kei-

Downey Bres and Job Stiles are shippin their deals by lighters from the public

James C. Wright's steam mill has started Mr. and Mrs. Elvin have returned from Hillsboro, where they have been spending

government steamer Lansdowne, who has been at his home at the Cape during the latter part of the winter, went to St. John last week to join his vessel.

### CHIPMAN.

Chipman, April 17—Regret will be heard because of the death of Mr. Alexander Baird, formerly a resident of this place, but who for years had been residing at Nashua, N. H. Mr. Baird united himself with the church when but a young man, and his Christian faith seemed to grow brighter as the years passed by. He was a man of much musical ability. One daughter survives him. She now resides

A very pleasant programme was carried out by the children of the Mission Band in the Presbyterian church of this place, on the evening of the 14th. The collection was \$26.

A number of lumbermen have got their drives out and business is brisk. The King Lumber Company expects to start their mill on the 21st.

of the 71st Regiment led the procession, which was nearly three blocks in length.

Fred. P. Hall, of this city, will leave for St. John tomorrow to accept a position on the steamer Cumberland.

William Richards, the lumberman, has been confined to his home at Boiestown for the past fortnight by a complication of discours.

The condition of Frank Shute, ill at Havana, continues to show indications of improvement. A cablegram received at noon Saturday by his brother, A. A. Shute, stated that he passed a comfortable night.

The condition of Frank Shute, ill at some time with her brother, Professor Titus, St. John.

Mrs. F. Bent spent Saturday in Moneton.

The many friends of Henry Mitton, and the state of Henry Mitton, an

has been the earliest on record.

Dalhousie has lost one of its best citizens recently in the person of P. G. Allain, who died suddenly. The deceased was a native of Nequac, Northumberland county, and had resided in Restigouche county for a great many years. His age was 65. He leaves a widow to mourn his loss.

P. B. Troy, contractor, has resumed work on the new Presbyterian church and everything points to the new edifice being completed before August.

The Dalhousie Club now numbers some 60 members. Its rooms have been greatly improved. The formal opening of the club will take place with an At Home on the 29th inst.

Much sympathy is felt for the sufferers of the sufferers and the record of the season at their mill on the Oromocto on Monday next. They have of the season at their mill on the Oromocto on Monday next. They have of this season's cut about 2,000,000 in logs.

R. A. Estey's West End mill will be started about the first of May.

Advices from up river are to the effect that William John Nobles' drive on the Northwest branch of St. John, for Cushing, is making satisfactory progress. Mr. Nobles has had his crews at work eight days, and from this it is inferred that all the operators on the Upper St. John have commenced driving. There is over two feet of snow in the woods of that region.

Predericton, April 21—(Special)—The inquest over the body of the infant found on the 29th inst.

Much sympathy is felt for the sufferers on the Upper St. John have commenced driving. There is over two feet of snow in the woods of that region.

Predericton, April 21—(Special)—The inquest over the body of the infant found on the Lorne Hotel premises was con-

evening in the condition of William Richards, ill at his home in Boiestown

### GLASSVILLE.

Glassville, Carleton Co., April 19-Rev. Mr. Simonson, of Florenceville, preached in the hall at Esdraelon on Friday even-

went down to hear him.

Miss Bessie Simpson returned to Houlton on Monday, having spent the past month at home.

Frank Lovely went to Plaster Rock on Monday for a brief visit.

Mr. and Mrs. Henry Doherty came home on Tuesday after a pleasant visit among relatives and friends at Waterville, N. S. ville, N. S. Rev. M. Sterling, of Plaster Rock,

was in the village last week.
Dr. E. Welch went to Bristol on Tues Dr. E. Welch went to Bristol on Tuesday on professional business connected with the suicide of Creighton Bell.

Mr. and Mrs. James Adams, who have been spending the past week with friends and relatives here, have returned to their home at Ashland, Me.

Mr. and Mrs. John Gray intend moving in a few days to Ashland, Me., where they will make their home.

John McIntosh and James True returned last week from St. John, where they were buying goods.

they were buying goods.

James Wallace left Tuesday for Ashland, Me., where he will enter the employ of James Adams.

Joseph Pearson, who has been in the employ of T. Lynch during the winter, has returned to his home in Peel.

### CAMPBELLTON.

Campbellton, N. B., April 19-Work on the sewer system will be resumed on Monday next, and Contractor Mann expects, if labor can be secured, to complete the system by the 1st of July.

Engineer Thorold, of the system last year, arrived yesterday and went today to Newcastle where he expects to be located patting in the water and sewerare cated putting in the water and sewerage system there. David Richards has purchased the de-

sirable property on William street, from Charles Murray. It will be occupied the coming summer by Mr. Purvus.

Great anxiety is felt among the lumber men over the continued cold easterly winds, the snow wasting away and no water for river driving.

Mrs. Percy Baker, of Metapedia, is the guest of Mrs. Benedict.

Rev. Mr. Burt. of Shediac, was in town

for a few days this week.

Fred Kerr, a Campbellton boy, is on wisit home from Houlton, Me.

Miss Gertie Adams has returned home from the Ladies' College, Halifax.
Mr. and Mrs. William McKean,
Newvelle, were in town yesterday.

## WOODSTOCK.

A number of lumbermen have got their drives out and business is brisk. The King Lumber Company expects to start their mill on the 21st.

The steamer May Queen arrived last evening, the earliest on record.

REXTON.

Rexton, Kent Co., April 19—The funeral of the late Mrs. Peter Wilson took place on Wednesday afternoon last, and was very largely attended. Services were conducted at the house and grave by the Rev. Donald Fraser, and interment was made in the Presbyterian burial ground. The pail was borne by the following relatives: James, John, Thomas and William Jardine, Captains James Gordon and William Beattie.

Woodstock, N. B., April 21—Scott act matters have been creating quite a flurry of excitement of late. Information had been laid by Inspector Colpitts against the proprietors of the Aberdeen, Carlisle and Victoria, as well as against Mrs. Gould, for selling the beverage in a Scott act town. The cases were to have been tried been hird by Inspector Colpitts against the proprietors of the Aberdeen, Carlisle and Victoria, as well as against Mrs. Gould, for selling the beverage in a Scott act town. # FOR THE TILLERS OF THE SOIL

ONE WOMAN'S SUCCESS.

At a recent farmers' institute at lamp beneath, and have them breathein the vapor. This vapor destroys all the germs of disease. The contagion can't spread—you save others. It

fowls and the profit she realized from them the past year:

"I have had some experience with poultry, as I have had the care of a flock of hens for the last twenty years, with good success. We keep about 200 hens. I raise from 100 to 200 chickens every year, hatching and raising them with hens. My way of caring for the chickens is this: I do not feed them anything until they are twenty-four or thirtyuntil they are twenty-four or thirty-six hours old and then feed them bread soaked in water for about a week, After that I bake commeal week, After that I bake commeatin a johnnycake and soak that and feed five times a day until they are about five weeks old. Then I feed wheat screenings or whole wheat, always giving them plenty of fresh water or sweet milk to drink. In caring for them in that way the loss from sickness is very small. Sometimes the crows or hawks will catch some of them.

times the crows or hawks will catch some of them.

"My way of caring for the hens is: In the winter I feed a warm feed every morning of bran with some meat feed mixed with it, either desiccated fish or boiled beef and bone, using seven parts of bran to one of the meat feed, mixed with hot water and fed while warm. At noon feed corn or wheat, and if they need more feed corn again at night. Always have a box with crushed oyster shells where they can get them when they want them, and given them all the fresh water they want. Two or three times a week I feed some vegetable food, cabbage or apples, if we have them, or potato parings. We keep our hens shut in in the winter, unless it is very warm. Don't forget that you must have a warm, dry

How to enlarge, extend, improve and scurre results in our Sunday school. Connections failing for White Head, a meeting was held at Grand Harbor. Bible Study and Normal Lessons were the subject, the president again in chair. On the 18th the parish convention was held at North Head. All pastors on the Island and were present. Normal Lessons, Decision of Scholars, Sunday School Temperance Work, Christ's Example as a Teacher, Parental Obligation to the School were (subjects to address and conference. Some 400 Sunday school shells as already belong to the somewhat new Temperance S. S. Army and other schools will introduce it.

P. Girdwood, principal of North Head all generated when the next convention will be held at the Harbor. The Sunday services of the field secretary when the next convention will be held at Grand Harbor. The converted here about 6.45 o'clock this evening by which two men book and another was injured and careful accident occurred here about 6.45 o'clock this evening by which two men book and another was injured and another was injured and their lives and another was injured as a meeting was held at Grand Harbor. Bible Study and Normal Lessons were the subolably that death is expected at any moment. A wagon containing three young makes the sales amount to \$306.17. The eggs used in the family are eighty-four dozen. Calling them a fishing trip and when near the corner and the extra dozen makes them worth \$12.12. You will see that the was just then passing along conference. Some 400 Sunday school and it ran directly across the track. P. Girdwood, principal of North Head and were fairly and the team, throwing Gilfoy and Shortall—was control of the animal and it ran directly across the track. The two first were literally torn to pieces before the speed could be checked. The two bodies are the fellow executive members will allot the Home, Normal, Temperance, Primary departments for development till fall when the next convention will be held at Grand Harbor. The field of the convention will be held at Gr used and the extra fowls, is \$393.39. The cost of feed for the year is \$159.73, a profit of \$233.66. If they had more room, they would have done better. I have had them do better than this. I shall continue in the poultry business as long as they do as well as they have the

Fertilizers Affect Seed Germination. The department of agriculture has had many inquiries concerning the effect of commercial fertilizers on garden and farm seeds. A number of tests were inaugurated, and as a result it was shown that in many cases, if not in most, the application of fertilizers directly in the row at planting time is detrimental. It seems that the injury is caused by affecting the sprout after it has passed through the seed coat. Muriate of potash and nitrate of soda in strengths of 1 per cent, or more are very detrimental to the germination of the seed whether applied directly or mixed with the soil used as a covering. The department of agriculture has

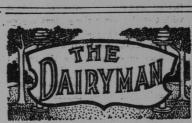

covering.
Fertilizers composed of phosphoric Fertilizers composed of phosphoric acid or lime are much less injurious than the above and, if not used in excess, may prove harmless. Commercial fertilizers should not be brought into direct contact with the seed or the soil in which the seed was planted. It is highly improbable that any of them, if applied in the usual way on top of the ground, actually favor germination. ground, actually favor germination.

The common way of setting a post, driving a heavy stake beside it and fastening them together with one or two cleats through which the gate must slide is expensive in both money and space. Where there are short turns the extra post is often in the way and the device here

HANGING A GATE ON ONE POST. shown is the best arrangement. T-shaped device is made by securely nailing two short boards together, and then to the post. The gate slides on this and is held in place by the arms of the T. The other end of the gate is held in a similar manner. The boards extend by the cleats on the front end which is the means of giving considerable strength to the gate.

Science on Apple Scab. The parasitic fungus usually called apple scab does not winter, as has been supposed, on the twigs of the tree, and therefore it cannot be killed by spraying before the buds open. This is a very important matter in practical orchard management, for success hinges upon its destruction and is dependent upon a knowledge

Louis Globe-Democrat. She says: ï stir all together till well mixed, pour into boiler on the stove and heat slowtub or churn if you have it. If you have about twelve gallons of milk, it will take one rennet tablet to make it. If less, take less of the tablet in proportion as one tablet makes 100 pounds

Dissolve the rennet in about two tablespoonfuls of warm water. When the milk has cooled to 85 degrees, stir in the dissolved rennet. Stir constantthree minutes you will see the milk is changing to cheese. Cease stirring now

completed before August.

The Dalhousic Club now numbers some offered and personal opening of the formal opening of the club will state place with an At Home on the 28th inst.

Sussex, N. B.; April 21—Rev. J. Deference of the home personal personal contract was a work eagust of the properties of the home personal per

taste and chop fine with chopping knife. Lay a square of muslin in your hoop (pail or peck measure). The mus-lin should be dipped and wrung out of hot water. Pour in the chopped curd. Bring corners of muslin up and pin over top of curd. Never mind if hoop is ever so full. It will sink down, Set to drip on top of pail or pan. Put light weights on at first. I use my two flatirons that have the patent handle.

Let it now stand this way for four hours. Take out and change muslin and turn cheese; return to the hoop. add more weight and repeat this till cheese only makes the cloth damp. I usually change cloth and turn cheese about twice a day. Thirty-six hours is sufficient time for a small sized cheese to press. Now take from hoop, cut cheesecloth to fit around cheese large enough to lap on both ends of cheese. Cut two pieces to fit ends. Now smear all over with good salt butter. Put your cheesecloth smoothly on and paste cheese fly. Put cheese in cool, dry, airy place and rub and turn every day to keep off mold. If butter dries in, put on a little more.

## SILOand ENSILAGE

I have a silo which has been in use for eight years and has always kept corn silage in good shape, says F. W. Wilson in National Stockman. The foundation was certainly no bother to me. It was made as follows: I started on a clay bottom, having first scooped out the top soil, leaving the inside basin shaped. Then I put in ten good sized white oak posts, putting them in the ground over three feet and leaving the top stick out three feet. On this oundation I put an eight inch sill, spiking it firmly to posts. Then I took my 2 by 8 twenty foot white onk studding and mortised them in the sill. The frame was 8 by 121/2 feet on the inside, with square corners. I nailed rough boards on inside of studding and on these put heavy tar roofing paper. At cost \$1.25 per square.) Then I finished the inside with hard pine flooring and weatherboarded the outside, as the silo was built outside of the barn. A few days ago I examined the posts and studding and found them as sound as the day they were put in, but owing to a tenant leaving some rotten silage in the silo all summer I had to put in a new lining for three feet up from the

rats getting in and working on the bottom some, which I will remedy now by putting cement in the bottom. Silage For Dry Cows. Silage and hay will make a good growing and maintenance feed for young stock and dry cows, but will not suffice for cows from which one expects any considerable amount of milk, says Hoard's Dairyman. One reason for this is that such feed is very bulky, and the cow cannot eat enough of it to supply the necessary nutriment for bodily maintenance and furnish solids for milk. A further reason is that a ration composed exclusively of silage and hay does not contain enough protein. Therefore if the cows are giving considerable milk they should have some concentrated feed fairly rich in protein, such as bran, gluten feed, glu-

floor. The silage rotted on account of

meal: etc. For the young stock and dry cows and all the hay they will est without

THE USEFUL ANGORA.

His Mission to Supply Mohair and Unlike that of the Belgian hare, the ingora goat business cannot be called a fad, for the reason that the animal in question is and has been for long, long years an animal of utility, still is an animal of utility and will continue to be an animal of utility just as long as mohair is imported into this country or is exported from it, as it is most assuredly bound to be some day, says Shepherd Boy in Wool Markets and

he will no doubt take his stand with cattle, sheep and hogs in feeding the ever growing meat eating population of the world, but he is never intended or destined to kill either the beef, mutton or pork trade of this or any other country. When venison is scarcer and consequently dearer than it is today, Angora meat will take its place and give to both the rich and poor epicure a taste of meat which to the writer is indistinguishable from that of the deer. The Angera is not destined to kill the wool industry of the world, for the warmth of the sheep's fleece will be

always sought by all manner of people in the temperate and frigid zones. His

mission is to supply mohair for the manufacturer of delicate fabrics and to clear the brush from off large and small tracts of land extending more or less from Maine to California. At the second annual sale of Angora goats recently held at Kansas City the champion buck of the show was bought by Mrs. M. Armer of Kingston, N. M., for the record breaking price of \$1,050. He is a notably fine animal, and experts consider that he is worth the

a windbreak is one of the cheapest and most practical buildings the stock feeder can have, says C. P. Reynolds of Michigan in Farm and Home. Several years ago we disposed of an old log house. Finding the roof in very good condition, I determined to use what was necessary of the roofing and suffi-cient lumber from the ceiling to make a windbreak. An open shed is the result, and it stands today after nearly a score of years of practical service. The building if 48 by 10 feet. The posts at the rear are about 7 feet high and nearly 10 in front. Plates were laid over the tops of both sets of in four sections, was placed on top of these and spiked. The rear was sided up, also the ends. It makes a most decided difference in the warmth of the

yard during rainy and windy weather. In summer I have known cattle to come all the way from the back of the pasture in order to stand in its shade. During stormy weather in spring or fall it is generally well filled with cat-tle protecting themselves from the ele-ments. One can scarcely appreciate the difference that such a pretection is to a yard. The shed covers nearly all of one side of the barnyard. Several years ago, before our silo was put in, corn stover was hauled and placed in a long continuous stack on a second side, which was an additional protection to the yard during stormy weather. A great many farmers could profitably, follow the windbreak stacking and se-cure protection to stock in the yard during a greater portion of the winter.

Rations For Fattening Steers. The following combinations of feeds will be used in the steer feeding experiments at the Oklahoma experiment station the coming winter. The amounts in each ration are computed per day for a steer weighing 1,000

Ration 1.—Cottonseed, 12 pounds; Ration 1.—Cottonseed, 12 pounds; cottonseed meal, 3 pounds; wheat straw, 10 pounds; prairie hay, 4 pounds; cost, 15% cents. Ration 2.-Wheat chop, 111/2 pounds;

cottonseed meal, 3½ pounds; wheat straw, 10 pounds; prairie hay, 4 pounds; cost, 20 3-5 cents.

Ration 3.—Cottonseed, 12 pounds; wheat chop, 5 pounds; wheat straw, 4 pounds; cost, 20 3-5 cents. 10 pounds; prairie hay, 4 pounds; cost, 17% cents.

pounds; wheat straw, 20 pounds (onehalf of this to be cut and mixed with the meal); cost, 17 cents. Ration 5.—Cottonseed, 13 pounds; wheat straw, 10 pounds; prairie hay, 4 pounds; cost, 12% cents.

Ration 4. - Cottonseed meal, 10

Fattening Cattle. Fattening stock may be fed quite often, but should at no time be fed more than they will eat up clean, says Kansas Farmer. In nearly all cases the more rapidly animals are finished and fattened the greater the profit. Better results will be secured if all the

young stock are fed separate from the ten meal, brewers' grain, cottonseed old animals. Best Condition For Breeders It is a mistake to keep breeding ani-mals excessively fat. Excessive fatfeed from five to ten pounds of hay and all the silage they will eat or conversely twenty-five to forty pounds of silage tended for the butcher. All others should be kept in a good, thrifty con-
