The facts fully justify every claim put forth in behalf of THOMAS' ECLECTRIC OIL. Testimony of the most convincing nature, to which publicity has been frequently and widely given, and which can easily be verified, places eyond all reasonable doubt the fact that it fully deserves the confidence which the people place in it as an inward and outward remedy for coughs, colds, catarrh, sore throat, inclpient bronchitis, and other disorders of the respiratory organs, as a means of removing pain, swelling and contraction of the muscles and joints, rheumatism, neuralgia, kinney disorders, exceriation and inflammation of the nipples, burns, scalds, bruises, corns, and a vsriety of other diseases and hurts, and of abnormal conditions of the cuticle. It is inexpensive and safe, as well as prompt and thorough. Its merits have met with the recognition of physicians of repute, and veterinary surgeons, horse owners and stock raisers administer and apply it for colic, galls, affections of the hoof, sweeney, garget and troubles incident to horses or to cattle. Sold by all medicine dealers. Price, 25c.

FINANCE & COMMERCE.

True Witness Office, Tuesday, August 19. Financial.

The suspension of payment by three banks in Montreal almost within one week, as recorded at our last reference, had a tendency for a few days to disturb, and in some measure depress, trade in various parts of the country where these weak banks had been doing business. But, inasmuch as the element of surprise with regard to cach of the suspensions was almost entirely absent, we do not think the apparent district or slight interference with business can be lasting. Long before these banks closed their doors, some of them at least had so restricted their business that customers were obliged to go elsewhere; before these banks closed their doors, some of them at least had so restricted their business that customers were obliged to go elsewhere; thus public confidence was shaken, and depositors were, in many instances, quietly securing themselves. The event proved to be but the fulfillment of what had long been expected, and therefore the excitement caused was but temporary; and it is generally believed by enlightened business men that the stoppage of these institutions will prove beneficial to the business of the country. True, divioends were paid by each of these banks, but the opinion of the general public is that they were not earned for some time past, and as the directors were evidently as unacquainted, in most instances, with the real state of affairs as outsiders, this opinion is probably correct. The management of the Ville Marie bank, however, do not appear to have yet decided upon retiring from business and going into liquidation. The casuler states that the notes falling due are being paid up rapidly at the bank, and that the circulation has increased by over \$75.000 since the su pension of specie payments. If the notes continue to be met as promptly as at present, he hopes to be able to surmount the difficulty and resume payments before the expiration of the 91 days allowed by law to meet the liabilities. In any case, he expects the assets will be sufficient to pay shareholder, at the rate of 70 or 80 pr cent. The last government statement of this bank showed a surplus of assets of nearly \$50,00, but it is a great question as to how much of this amount could have been realized.

Another recent and important event in financial circles and which has caused fresh exciteding the payments before the expiration of the same an alsake to suppose the circumstance of the bank of Montreal. The particulars will be found on another page of this paper. Although there are not wanting those who are slowed to accept the explanation given as to the cause of Mr. Angus general manager of the bank of Montreal. The particula

dated, 85 to 90 for Ville Marie, and 50c on the dollar for Mechanics', and the latter are not in demand at even this price. -The traffic earnings of the Great Western

railway for the week ending on the 8th instant were \$79,390.92, against \$75,211.90 for the corresponding week of last year, showing an increase of \$4,179.02. During the past week the bank of England

gained £36,000, and the reserve, which last week was 55% per cent of liabilities, is now 561-16 per cent. The posted discount rate of the bank is 2 per cent, which is something more than double the rate at which prime bankers' bills are discounted. It is not unlikely that the drain of gold to New York will cause an early increase in the rate.

The London Times, in a recent financial article, says :- "It is not possible to say decidedly what caused the slightly increased firmness of the money market yesterday (Tuesday). It is ascribed in some quarters to apprehensions that large quantities of gold may be withdrawn from the Bank of England for New York, but it would take a most no table demand to deplete both our stores and those of the Bank of France. Still, the effect of such a withdrawal would be much more marked now than in ordinary times. Many borrowers now enjoy very limited credit. Banks will not lend freely, and a very slight extra demand immediately reacts on the market in an exaggerated fashion. Everything is stagnant, and to all appearances may remain so for some weeks to come."

Soda ash is quiet here, but though the position generally favors buyers, manufacturers are incisposed to lower their prices, and the differences of 1.32nd is in many instances stopping business. We can now mark a further decline in caustic soda, but ere long a great diminution in the production will probably be caused by these low prices. Bleach crystals as discarbonate are quiet at quotations. Freights from Liverpool by sail or steam, to Quebec and Montreal, is nett.

DRY GOODS.—During the past week orders from country merchants have been fairly numerous, and a rather better feeling on the part of western buyers has been manifested. Travellers who are still on the road, report that a good many many merchants have bought merely to sort up, and they purpose visiting the market personally a little later on. Stocks are almost more than well asserted, this season and the trade generally will hall with pleasure the return to the old system of buying in person. Remittances are not what they were expected to be, but an insprovement is confidently expected after harvest.

Montreal Horse Market.

MONDAY, Aug. 18.

Monday, Aug. 18.

As is usual at this season of the year,—during harvest time,—the supply of heavy draught and good carriage horses for sale is very small in this market, and accordingly but a small business has been done in horse fiesh during the past week. There continues a good demand for gentlemen's driving horses, about 16; hands high, but buyers report that although they are willing to pay handsome prices, the class of horses required is not to be had in the country. This statement may be considered doubtful, but it is certain at all dyents that they are not forthcoming, as the horses now arriving are nearly all small, light animals. There have been few American buyers in town during the week, and shipments from the American house yards were light, owing chiefly to the scarcity of suitable horses two cars of small Ontario beasts were sold at prices ranging from \$40 to \$45. There are at present some half-a-dozen buyers at the American house, and about a dozen horses in the stables

At the weekly auction sale on the Corporation horse market last Friday, Mr. Maguire sold two aged horses, one at \$33, and another at \$40; also a six-year-old carriage beast at \$61. Complaints are made that the corporation do not enforce the city by-laws which compet all parties having horses to sell to enter the market on College street. It is stated that they are regularly exposed for sale on the same street, outside of the market place. During the week 68 horses were exported to the States at a total value of \$4,966 50, again-t 5 horses, valued at \$1,398. So, shipped during the week previous.

Following is the list of horses - hipped through the United States consulate here from this port to the United States during the past week:—

August 9th—Two horses at \$141. August 11th—Six do at \$1,394. August 12th—Twenty-one do at \$1,506 at \$1,500 and \$250. August 16th—Nine do at \$1,501.

Some holders of last year's hops have recently placed their stocks, while others have held them for prices far above current quotations. There have been recent sales of 40 bales of inferior to good qualities at 2c to 6c. and a small parcel at 71c. Some holders ask 10c and upwards, but no sales have been reported at these figures. Brewers are not buying as they have sufficient stock to carry them over until the new crop arrives, which will be very shortly. The New York market continues very firm at the late advance, and offers of 30c for the new crop of state crops have been refused Choice state of 1878 growth are worth from 18c to 2cc, It is estimated that the present crop in New York state will not be more than one third to one-half as large as that of last year. Advices to nearly the same effect have been received from England and Germany.

-The three fine steamships, Scandinavian, Prussian and Nestorian, of the Allan line, have recently been fitted up specially for the purpose of transporting live stock, together with general cargoes, across the Atlantic, and are considered three of the finest steamers in the trade plying between this continent and the United Kingdom.

Freight Rates.

The joint executive committee, representing nearly 30 American railroad companies, have unanimously adopted the following proposition: "To discontinue hereafter the practice of contracting for any sp-clal or given lots, blooks or quantities of freight at tariff rates, or at less than tariff rates, to the seaboard, on home or foreign business, and to give ten days' previous notice of any increase in the tariff." Commismissioner Albert Fink, chairman of the joint executive committee, has issued a circu-ar setting forth that the committee have voted in favor of an advance in east-bound rates on the hasis of 30 cents for grain, 35 cents for fourth class, and 45 cents for live hogs from Chicago, to take effect August 25th, 1879.

An Ever Recurring Horror Averted. Time was when the very mention of medicine in a nousehold was received with bated breath, and the most efficacious of all—Castor Oil—was in a household was received with once orients, and the most efficacious of all—Castor Oli—was looked upon with a feeling akin to horror. Now that is all happily averted. Thanks to Messrs. Scott & Bowne who have prepared an Kmalsion of Palatable Castor Oll that the culturen long for it. It is a delicious morsel, and the great trouble is not to get them not to take it, but to prevent them taking too much. Price 25 cents.
