WITH

CANADIAN CHEMICAL COMPANY, LIMITED

This advertisement will be of most interest to graduates in chemistry, chemical, mechanical and electrical engineering and engineering physics.

What interests you most about a career? Opportunity should. Opportunity not only for advancement, but opportunity for professional growth through varied and interesting experience. We firmly believe in diversified experience and, luckily, we can offer it in our fully integrated operation. We find it's best for you (makes life more interesting and provides greater opportunity) and best for us (we end up with senior people who are fully experienced in our business). Now, let's have a crack at answering some of your questions.

What do we do? Canadian Chemical Company produces basic organic chemicals, cellulose acetate flake and acetate yarns, fibres and staple.

Where do we do it? At Edmonton. We have three plants on a 430 acre site. The first produces chemicals alcohol, ester and ketone solvents, acetic acid, glycols, pentaerythritol, formaldehyde and other organics. The second produces cellulose acetate flake. The third, acetate and Arnel yarns and fibres.

Sales offices are located in Montreal, Toronto and Vancouver.

What is our future? Very bright. (It just happens to be true.) We think of ourselves as a young, progressive, fast-growing Canadian firm with world-wide affiliations. The record bears this out. So does the operation of our Edmonton plant. And the fact that our engineering department is one of the largest and most diversified in Canada.

Our raw materials are basic Canadian natural resources: petroleum by-products from Alberta and cellulose from the forests of British Columbia. Our markets are worldwide, and through our affiliates we have a strong alliance with companies in the textile, chemical and plastics industries.

What would you do? As a qualified chemist or engineer you could be working on product development, research, process engineering, plant design, construction or some aspect of production. This is exciting work in many completely new fields. As a chemist or chemical engineer you could choose also a career in sales or technical service.

What else should you know about us? Lots more. You can get more information and literature by writing to Department "A" at 1600 Dorchester Blvd. West, Montreal 25, Quebec. Or to the Personnel Department, Canadian Chemical Company, Limited, P.O. Box 99, Edmonton, Alberta.

Robert church named wusc national wheel

OTTAWA (CUP) gates to the 16th annual assembly of the World University Service of Canada held here last weekend elected a new chairman and expanded their. activities overseas.

Dr. J. F. Leddy, vice-president and dean of Arts and Science at Saskatchewan was elected chairman replacing Dr. James Gibson, dean of Arts and Science at Carleton who became honorary vice-president.

Other officers elected to the student-faculty organization were: Jacques Gerin, (U of Montreal) former president of NFCUS who was reelected vice-chairman; church, Alberta; Alan Golden, Mc-Gill; George Hare, Mount Allison; Davil Hill, Queen's; Alexandra Johnson, Toronto; and Clement Richards of Laval.

PROGRAM EXPANDED

Expanding its role as the welfare arm of the Canadian student WUSC

Join the Canadian University Service Overseas,

Supplement its present student levy with "gifts-in-kind" for students abroad.

Strive to meet a goal of 10 cents per student so that the profits from the Treasure Van can be used for its international program.

The decision to join CUSO makes WUSC the third large student organization to do so. The other two are NFCUS and the Canadian Association for Medical Students and Internes (CAMSI). CUSO, which is similar to the American Peace Corps, hopes to send 100 Canadian university students or graduates overseas next summer, for a period of one to two years, to assist in the development of countries less fortunate than

It was also decided to assist in this development by sending "gifts-inkind" (such as books) to overseas students. Universities which have a student levy and no SHARE campaign were especially asked to contribute to this project.

HIGH HOPES

The assembly hoped the Treasure Van which last year made a profit of \$16,341 would be able to contribute more funds to the international program and less to the national one. If the latter were to depend solely on student donations the per capita fee would be 15 cents. Since many of the universities failed to reach last year's goal of 10 cents, the goal was kept, with the hope that it will be

reached this year.

The delegates passed some 47 resolutions in all ranging from scholarships to decentralization. Foreign students who will come here to study must still state their intention to return home after the study period is over. However under extenuating circumstances, such as matrimony e student may remain in Canada and not be required to pay back the cost of scholarship.

RAISE STANDARDS

Standards for the scholarships will be raised with a view to making them more appealing. These are still of a one year duration subject to re-newal by the WUSC scholarship

At the request of a delegate from the University of Montreal WUSC will set up a committee to look into the decentralization of the organization which has its headquarters on the University of Toronto campus.
The delegate believed that the Quebec universities might receive more benefits from the service if ft was decentralized and there was more personal contact between the national office and the local groups.
