
Our Patrons and the General Public.

N presenting our Catalogue for 1891, we wish to direct your attention to the following important points:—

- 1st.—We shall, as formerly, confine ourselves to one grade of goods only, viz: A1 or the best grade. No number 2 or B work will be furnished.
- 2nd.—The proprietors themselves, who are expert mechanics, will personally superintend all departments of work, and only the best stock in the market has been, and will be, provided.
- 3rd.—We call special attention to improvements in the designs of our Standard Styles of Buggies, and also to several new designs, all of which cannot be excelled in symmetry, compactness, lightness and graceful appearance.
- 4th.—Years of wear have established the superior durability of our vehicles.
- 5th.—We unhesitatingly assure all that orders will be promptly filled. During the past year we have been delayed by the inability of others to furnish material in time and by extensive improvements we were making in our premises. We have nearly doubled the capacity of our Machine and Work Shops, and have now, in every respect, the best equipped and most extensive Factory in the Dominion. It is a three storey building, having a frontage of 40 feet and depth of 43 feet. Our entire energies will now be directed to properly and promptly executing orders. We have completed arrangements for large quantities of material, and have on hand, ready to ship, five times the quantity of stock we had last year at this season.

A WORD AS TO PRICES.—We simply ask our customers not to expect impossibilities. We cannot sell a first-class rig at same price as others ask for a second or third class one. We justly claim that no one can under-sell us without reducing the quality of the goods. "A word to the wise is sufficient."
