

Waterman's Ideal Fountain Pen

*The Super-Pen
for
Our Super-Men*

From an almost limitless variety of Waterman's Ideals we select for special recommendation the pens illustrated—as being extra large and strong and therefore more serviceable and more suitable for use on Active Service.

A Lieutenant writes: "I feel it my duty to write you a few words of praise for the Waterman Safety Pen which I use. Bought before the war it has been my never-failing friend. During seven months' training, sixteen months in France, and thirteen months in hospital, and in Camp, Dug-out, Trench or Hospital Bed, it has simply proved invaluable to me. It is the pen for Active Service without a doubt."

Waterman's Ideal Fountain Pen is strongly and accurately made. It well withstands the rough wear of Active Service. Its supply of ink cannot evaporate or escape. It always writes at once without blot or blur, and the reservoir holds sufficient ink to write thousands of words.

Waterman's Ideals are made in three types; Lever Pocket Self-filling and Safety Types, 15/- and upwards; Regular, 10/6 and upwards. Of Stationers and Jewellers everywhere.
