### ON SEA-SWEPT SABLE ISLAND

on, of Hali-

rday in St.

ove

CO.

NE hundred and eight miles off the coast of Nova Scotia, and lashed by the terrific storms of the Atlantic ocean lies Sable Island. It is one of the most oteresting outriders of the whole Atlantic crowned;
coast and constitutes not so much an Not bays and broad-armed ports,

sset as an international perplexity. The battering of wind and wave has greatly reduced the island area, substituting here and there hidden sand bars for what was visible dry land but a few years before. To mariners, Sable Island represents a constantly increasing danger, despite the best efforts of the Canadian Marine department with modern lighthouses and sound signals.

In 1901, the late Dr. Saunders, as Director of the Central Experimental Farm, Ottawa, took steps to prevent the destruction of the island by planting out 80,000 trees and shrubs. The lack of uccess has probably put an end to all effort to offset the disintegration of the remaining area. In reply to a question of the Forestry Journal Dr. J. H. Grisdale, Director of the Central Experimental
Farm, states that no work in planting on
Sable Island, subsequent to that described
Who dare when others fly—

would be as great as now, and the possibilities of rescue of shipwrecked persons, (with the life-saving station gone) would be reduced to a minimum.

Three years ago, the Canadian Forestry Journal, touching upon the failure of the first experiments at Sable Island, asked:

"Is not such a danger worth the spending of many thousand dollars to avoid? On similar plantations (similar, at least, as regards the problems presented by natural conditions) France has spent several millions of dollars, and the single state of Massachusetts some hundreds of thousands.

"In the problem presented by Sable Island not only do property considerations enter, but considerations involving the saving of human life. At the least the subject is worthy of continued and persistent experiment, and it is to be hoped that the authorities will not rest satisfied, or torpid, in consequence of the failure of this one attempt."—Canadian Forestry Journal, June 1917.

This price has great as now, and the possibilities of rescue of shipwrecked persons, with the life saving station gone) would be reduced to a minimum.

In Saint Andrews **During Winter** Months

DR. WORRELL has decided to close his office in Saint Andrews on or about October 1st, probably until about May 1st, 1918.

He therefore invites all his patients who have not been recently attended to, to come in at the earliest opportunity and have their teeth examined and attended to if necessary, in order to avoid suffering or inconvenience during his absence.

Do not wait until the last week in September and then expect to get fixed up, but come in while the coming is good.
