THURSDAY, MAY 13, 1920

The leaping brook trout painted in natural colors on the cover of the May issue of **ROD AND GUN IN CANADA** will quicken the pulse of every nature lover. This issue of Canada's leading sportsman's monthly contains the first installment of Harry M. Moore's thrilling story of adventure entitled, "The Silver King." "The Kananaskis Lakes" is the title of an interesting fishing story from the Elbow River valley. It has seven clear cut photos to illustrate it. Bonnycastle Dale tells in his own gripping manner the story of the wild cat, its range and habits throughout Canada. S. C. Cain humorously relates the story of four fishermen on a week-end trip to Lake Seagow after bass. The Guns and Ammunition and Fishing Notes Departments are up to their usual high standard in this number. A valuable addition to the fisherman is the inclusion of the open fishing seasons for the Dominion. **ROD AND GUN IN CANADA** is published monthly by W. J. TAYLOR LIMITED at Woodstock, Ont.

## ALMOST A WHOLE FAMILY PERISH.

Two sisters, sole survivors of a once happy family, greeted us pleasantly, as we visited in a sunny ward at the Muskoka Free Hospital.

The mother and several other members of the family had died of consumption, and the plague had marked these two girls also for its own; but fortunately they were found in time.

One of them said: "I feel the hospital has done me a great deal of good; everything is lovely, and I like it awfully well." The other: "I have gained twelve pounds, and think I will be able to go home for good in six months."

Such is the work of the Muskoka Free Hospital for Consumptives. Thousands of grateful patients can testify to the help they have received therein. It costs a great deal of money to carry on the work. Will you help?

#### TOWN HALL DANCES.

Editor of the Reporter:

Sir—Please give the writer a little space to say a few words regarding the many dances which are held

## CANADIAN NATIONAL RAILWAYS

### Change of Time

Effective May 2nd, 1920

Particulars and full information from nearest Agent.

In the town hall, at Athens annually. I have no objection to dances being held only where they are carried to extremes, and if there is any place where dances are too numerous, it certainly is the town hall at Athens. There are too many and the fee is too high. Parents, both in the village and surrounding country are endeavoring to send their children to the high school in order to fit them for the time when they will have to provide for themselves. The cost of an education today is not small. Books, clothes, railway fare in some cases, all means a lot to parents. The majority of parents have little money to throw away in dances for their children and where there are a couple of boys who attend one of those big dances every two or three weeks at \$1.25 each it hits the purse of the parents rather hard. Then the girls have to take a cake worth 75c. or a \$1.00 not saying anything about the extra party dress.

The pupils must have amusement but we know that those dances fill their minds full and so hinder their progress at school.

I would not suggest cutting the dances out altogether but I think three or four dances in the town hall in the course of a year are quite sufficient. Instead there are about a dozen, say nothing of the smaller ones held in the institute rooms.

We think it is high time some of these dances were cut out.

Parent.

### WHAT A NURSE FOUND.

While making her visiting rounds one morning a nurse of the Muskoka Free Hospital for Consumptives discovered a particularly sad case.

On a dingy street, in a hovel which they called "home" she found a mother dying of consumption. The house was in a filthy condition, rolled garments, unwashed dishes, and food lay about, even in the bedroom itself there stood a loaf of bread and an uncovered bottle of milk.

Amidst it all two children played, both too young to help or to realize that they would soon be left alone. The mother died before an ambulance could be summoned.

This is but typical of the wastage of consumption; the poor are its special victims. Try to work they are unable to supply even the necessities of life. You will wish to help. This can best be done by assisting our Hospital work.

Contributions may be sent to Sir William Gage, 84 Spadina Avenue, or George A. Reid, 223 College Street, Toronto.

The old saying that "One man's meat is another man's poison" appears to be true in the case of different kinds of live stock. It is a fact that some plants which poison horses are not injurious to cattle or sheep, and some which cause loss among cattle and sheep are not eaten by swine and horses. In Bulletin No. 39, Second Series of the Experimental Farms, "Principal Poisonous Plants of Canada" by Miss Faith Fyles, B.A., obtainable free upon application to the Publication Branch, Department of Agriculture, Ottawa, a list of plants which do injury to the various classes of animals is given. The bulletin, which is prepared for

live stock owners, gives information regarding poisonous plants and enables the farmer to distinguish the most harmful species in his neighborhood so that he may be able to avoid pasturing animals on infested areas until the danger is past. The yearly loss due to plant poisoning is known to be on the increase but the amount of the loss is not ascertainable because many fatalities are attributed to other causes through lack of knowledge of poisonous plants.

— and this is the greatest surface saver of them all.

LOSS from paint-neglect is vastly greater than the cost of paint-protection. But it is to be noted also that the real cost of using ordinary paint—however cheap it may be—is vastly greater than that of painting with a pure and durable paint such as

**B-H PAINT** "English" 70% Pure White Lead (Genuine Genuine B-H) 30% Pure White Zinc 100% Pure Paint

If you would avoid constant repainting—if you would have the paint that has maximum covering capacity, investigate the cause of the high reputation attained by B-H. You'll find that the favor in which it is held by so many experienced painters is due to a truly remarkable degree of purity—a purity attained by using such ingredients as the famous Brandram's Genuine B.B. White Lead—together with pure zinc and the purest linseed we know how to make in our own splendidly-equipped mills. Your investigation will result in a trial of this brand—and that trial will make you a confirmed adherent of this paint that goes so far and that lasts so long. Its fine, smooth surface never cracks or peels—the tough, air-tight coat it gives affords the surest kind of surface-protection against time and weather.
