NEWCASTLE, MIRAMICHI, N. B. WEDNESDAY, MAY 16, 1883. THE CANADA PACIFIC.

On Friday last, after several postponements on account of ill health, Sir Charles Tupper delivered his Centennial and Loyalist Memorial Associa-Sir Charles Tupper delivered his speech on the Pacific Railway Policy of the Government. Sir Chas. commenced with a regret that the state of his health would not enable him to construction of that great work, a work so great that my hon. friend the leader of the late Government stated on an important occasion that all the resources of the British Empire were not sufficient to ensure its construction within ten years, a work so great as to have baffled the efforts that had been made by two governments to give it any very great prominence: I say, sir, that the contract for that work required that it should be completed by the first day of July. 1891. We are enabled now to say that if the progress in future is equal to the progress of the past, we may confidently expect the statement of the Canadian Pacific Railway, that by the end of December. 1886, that dred. From what little hair remained

He pointed out that the progress so far made was entirely unprecedent ed, and that there has never in the history of the world been an instance laced boots, knitted drawers and linder ed, and that there has never in the in which the same amount of progress was made in the construction of any line of railway. The state of railway from the same amount of progress and white shirt. The sleeves of the shirt were gone except one cuff in which there was a steel classe. In the same amount of progress was made in the construction of any line of railway. was made in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any there was a steel sleeve link, at the line of railway, from one end, as in the construction of any the construction of the shirt was a gold plated of the construction of the construct the present occasion. In fifty three consecutive working days a total of 174 63-100 miles were laid on the main line, being an average of 3.15 in fifty three consecutive working days a total of the shirt was a gold and in the bosom was a gold to the shirt was a gold and in the bosom was a gold and in the bosom was a gold and in the bosom was a gold consecutive working days a total of the shirt was fine of the bosom was a gold and in the bosom was a gold consecutive working days a total of the shirt was a gold and in the bosom was a gold consecutive working days a total of the shirt was a gold and in the bosom was a gold consecutive working days a total of the shirt was a gold and in the bosom was a gold consecutive working days a total of the shirt was a gold of the shirt was a gold consecutive working days a total of the shirt was a gold on the shirt was a gold consecutive working the shirt was a gold on the shirt was a gold on the shirt was a gold stated that he had received an official letter from Mr. Sandford Fleming Chief Engineer, in which he states that the character of the work is far better than he expected.
