To Josh Ross, Esquire, Patentee of Artificial & Metallic Paints.

Sig.
We the Subscribers, House Joiners and Painters, by trade, having been using your "Artificial Slate" for upwards of three years deem it a pleasing duty to express our opinion, that this composition far exceeds any other paint for covering the Ross of Houses,—apart from its fire proof quality its value for protecting wood from the decaying influence of the weather is exceedingly important. We know of many buildings covered with suced shingles painted with Artificial Slate, which have stood the test of sumooth, as when first laid—the whole roof appears to be comested together, impervious to moisture and consequently and subject to decay.

We regard the application of "Artificial Slate" to astroed shingles as a matter of great economic value, and feel desirous that it should be generally known that saved shingles as covered are superior in point of finish and durability, to those split and shaved—We are sit, yours, see.
