Mrs. F. Gervais, of 126 Bleury Street, Montreal, writes:—"My baby girl developed a bad rash on her body and it made her very fretful and ill. She would not take food, and seemed very sick indeed. From fifteen pounds, her weight fell away to nine and a half pounds.

a hait pounds.

"I took her to a doctor who gave me a kind of lotion to use and I used it regularly, but the baby got no relief. The skin disease seemed to get worse and worse all the time we were doctoring for it, so we took the child to a second doctor. He told me to stop nursing the baby, and gave me other advice which I followed, but the skin disease got worse and worse.

"At this time a friend of mine visited us and, having seen the sad plight the baby was in, she said I did not know how to go about things. She took my haby to her home and applied Zam-Buk to its little body. This seemed to give the baby ease right from the first. It cured the sores and began to reduce the inflammation. I went on with the Zam-Buk treatment, and to my delight, within one week from first starting.

with Zam-Buk the child looked like a different baby altogether! Within a month the skin disease was cured completely, the baby's appetite had returned, and she was almost back at her normal weight. She now looks like the very picture of health.

"There is another feature of the case. One of the doctors has just sent me in a bill for \$30! The treatment I got for that money left the child no better than before it was started. The cost of Zam-Buk treatment, which restored my child to be it is, was \$2!"
