# CURIOUS INSTANCES

Silently, but none the less joyfully, the marriage of Mrs. Sarah O. Marsh and Mr. George Woolmington was celebrated the other night at the home of the bride's mother, Mrs. Sarah Osborne, No. 166 Princeton street, Cleveland. Both the bride and groom are deaf mutes, and the ceremony was performed by a deaf mute clergyman, Rev. A. W. Mann, who is an Episcopal missionary to deaf mutes. The solemn words which pronounced the couple to be husband and wife were delivered in the sign language, and the responses were also made in the same manner. The bride, looking very beautiful in a blue organdie gown, was at-tended by Miss Maud McClintock as bridesmaid. Preceding her came Master Carroll Osborne, bearing the wedding

ring, and Miss Marie Selbach, carrying the bride's bouquet. Congratulations ex tended to the bridal party were none the less hearty because they were unspoken. After the ceremony the guests, many of them deaf mutes, crowded round Mr. and Mrs. Woolmington, and with flying fingers

and sparkling eyes tendered their best Ladies' and Misses' wishes and congratulations. This is the Ready-to-Wear Hats, in Hats, in mottled effects; bride's second matrimonial vent first husband having met his dea years ago in a railroad accident. was a deaf mute. especially on those public holidays on which they were once so common."

This is a reassuring declaration, but it has to be confessed that in the mother land, in temperance matters, they are still far behind the Dominion. This country is the most temperate of his majesty's English-speaking possessions, making no exceptions, and this Province of Ontario, according to British visitors, who have examined

for controlling the traffic in intoxicants. We must not become too proud to

look for means to make continued progress, but the facts set forth must youth of Hamilton may be deterioratbe cheering to all well-wishers of our country.

### A Word of Warning.

Emil Reich, a recent writer on "Engand at the Close of the Nineteenth Century," may or may not be reliable when he declares that Germany,

in her onward march, will be forced to fight and crush Britain: but in the following statement from his pen there is so much truth that it is worth pondering: "The English education of young men, precisely by making them virtuosi of will power at the age of be disinclined to agree with his fellow eighteen, inevitably sterilizes their intellectual elasticity. In England, everybody specializes at once; and only exceedingly few adopt the principle, that we must specialize only after having laid out a solid framework of general knowledge. It is therefore to be apprehended that the German fleet, even if numerically smaller, will, owing to better application of scientific principles, possess serious advantage over the British fleet. The Germans have, in their war with France, fully proved the superiority of scientifically trained theorists over more practical generals. Not one of the German generals had, with the exception of the Austrian campaign, in 1866, of three

weeks duration, ever been in a great war. All of them are 'theorists'; all the French generals were old practitioners; the result is known." This passage might be criticised at

various points, but we are concerned now simply to emphasize the truth that there is in it, viz., that we Anglo-Saxon people are prone to despise "theory," whereas real scientific theory is actually common-sense trained to greater keenness and accuracy; and in the second place we are in danger of specializing too soon. Every professional man is a specialist. Let us use them as an illustration. The doctor, who, as in the case of the union label other things being equal, who is likely to be the best doctor, the young man doing something, as well as in talking, who takes the shortest cut to a di- these people seem to be continually putploma, or the young man who, for its ting their feet in it. own sake, seeks a good, broad educa-

tion before going to the professional The Montreal Gazette, in its editorial school? The same thing applies all columns, is rather inclined to be pessiround. It is said that in the British mistic at times, when dealing with the navy every officer has a captain's cer- progress of the country under the new tileste, and on the same principle our order of things. But the truth gets

their valises and hie them to Great Britain to begin their self-imposed mission of converting English statesmen to Canadian Opposition views. Why still delay?

They are again calling lacrosse "the Canadian national game," notwithstanding the fact that nine out of ten Canadians never saw a game of la crosse.-Hamilton Spectator. What antipathy does our contempor for themselves, has the best system ary have to this fine old game? In by-

gone days, some of Hamilton's best young citizens were physically developan emergency. ed through the exercise of playing it, and they took no second place. The ing in their love of manly sport, and

may prefer to take their enjoyment sitting on grand stands while a few hired athletes show their prowess, but we take leave to doubt if the old ways when amateur lacrosse as well as amateur baseball flourished in our sister city, were not after all preferable to modern methods.

party in Ontario, is reported as expressing the conviction that any constituency can be bought for \$1,000. Mr. Wm. Smith, of Ontario County, will member of the Opposition. Under oath, Mr. Smith recently asserted that he spent at least \$1,200-he could not tell how much more-in buying votes. so as to secure the defeat of Hon. John Dryden. The depressing thing, in Mr. Smith's view, was that the men would not stay bought, and that Mr. Dryden is still the honored member of the constituency. Mr. Smith certainly disagrees with Mr. Campbell in his declaration that \$1,000 will buy any constituency, and he has many good reasons for doing so.

The Toronto Star, referring to the ecessity for promoting national undertakings to benefit that city, says Torontonians "should quit talking and do something." Our contemporary will recollect that last year representatives of Toronto in parliament did quit talking and did do something, and a fine ess of it was made. They talked first, it is true, against the measure championed by Mr. A. Campbell, Hon. Mr. Mulock and others for the establishing of a new direct line of railway from Georgian Bay to Toronto. and when their talk failed, and the

The Cigarette Evil.

Mr. Samuel Grigg writes: Dear Sir,-May I sound a note of

warning through your columns to unsuspecting parents and fellow citizens on a most important subject? During the year 1895, while running

the newsboys' hall, I saw some of the practice were they but partially acquainted with the terrific consequences evils produced, not only by the use attending cigarette smoking, to which of cigarettes, but also by the obscene they, by their example, often become pictures which were in the packages decoys to many of more tender years sold. As a result of my complaint and less moral strength than themspecial action was taken by the auselves. Thanking you, sir, for your thorities with the gratifying result space. that the unclean pictures largely disappeared although the evil of cigarette selling and cigarette smoking still re-PREMIER ROSS TAKES A REST. mains. At that time I made the state-Toronto, May 1.-Premier' Ross has ment that I would "prefer to see a gone to St. Catharines for a ten-days' boy take a drink of whisky from a rest and to take the sulphur baths flask than to use a cigarette," and there. In his absence Hon. J. M. Gib-while I then believed the cigarette to son, attorney-general, will be acting be the more ruinous of the two, I premier. am far more convinced today of the LITTLE BOY KILLED WITH tremendous evil consequences that follow its use. Since then I have lived Montreal, May 1.—George Lauson, 2-year-old son of Octave Lauson, died on Sunday from the effects of drinking to see many of the boys then addicted to the cigarette habit serving terms in the penitentiary for having become unwhisky. The parents left a bottle by their bedside, and when the child got

fitted for study and too lazy to work; up in the morning he drank some of the whisky and died soon afterwards. they have gone from bad boyhood to worse manhood, and crimes of various kinds have been associated with their Accidental death was the finding of names. I can honestly say after a the coroner's jury. varied experience of 32 years in the liquor business, having come in contact with the many injuries inflicted by the trade, that the cigarette habit bids fair to become a scourge greater than that for which the drink traffic is responsible. In bygone days I have passed through the subterraneous passages of the infernal opium dens of San Francisco, and the results there do not give cause for greater alarm than the prevalent curse of which I now write. It was in San Francisco that the medical inspector of public schools pronounced the cigarette habit greater in its evils than the oplum traffic. Loss of memory, blindness, insanity, lack of en-ergy, and worst of all, a blunted conience, are but a few of the fearful results foretelling national calamity

unless strong hands and courageous hearts are brought to overthrow the entrenched foe. Many of our leading and most successful business men are refusing to employ and discharging from their service those who are known to use the cigarette, and all fairminded men with but a superficial knowledge of the matter must agree that they are wise in their action in this respect.

those who do not, is not nearly as disastrous in its effects as the "cigarette habit," for the cigarette smoker takes the smoke into both lungs and brain, where its condensation produces the desired sensation, while the cigar or pipe smoker throws off to some extent at least the nicotine drawn into the mouth. A young man recently in-formed me that he requires as many as three dozen cigarettes to produce sleep, and on rising in the morning h prefers his favorite cigarette to break fast, liquor, cigar or pipe. The young man in question had been for some time a consistent drinker and smoker but the former practices have lost thei charm before the more poisonous and tupefying practice of cigarette smok ing. There is another man with whom I have been long acquainted, who, years after relinquishing the practice still suffered from the "tobacco heart," and often the physician had to be

called to attend him in the middle of plague. Dr. Labarge, the medical the night. In my work visiting jalls health officer, who examined the case and conducting missions I find the on the arrival of the steamship, proand conducting missions I find the evil making inroads in cities, towns, nounced the case one of measles villages, and even among boys and
