In a surplus reserve of \$147,825. These figures do not lend themselves to an optimistic mind concerning the immediate future of stocks. It is a queer makes possible almost a deficit in the bank statement and the easiest money market that has been since the latter part of November. It is also queer that all estimates were made by bank-rong, 47s. ers who have been exceedingly accur-American refined, in pails, firm, ate in their predictions heretofore that a fair surplus reserve would be shown in the bank statement. Estimates of last night and this morning from the same quarters varied absolutely and the qualification made yesterday that the developments of the day might change the situation were evidently significant. The situation that presents Montreal Ry., bds. itself now is that we have an incipient N. S. Steel, bonds...109 bull market and that we are confronted Scotia, bonds101 with a deficit. It is difficult to recon- Afternoon Sales: C. P. R., 25 at 195, 100 with a deficit. It is difficult to reconcile these conditions, but persumably they will adjust themselves satisfactorily in the near future. Copper and U. P. were leaders in the market, reacting somewhat after the bank statement was published, but showing in the main aggressive support. The best advices on present market is to go with the tide temporarily, but it does not seem possible that the tide can describe the seem possible that the se continue to flow the one way for any 144. material length of time. A WATER FAMINE

Citizens Say London Will Face It if Komoka Bylaw Is Defeated.

The Board of Trade present the following important statement to the citizens:

London is still being supplied with the waterworks system of thirty years ago. Its population has increased three times. The revenue from the water supply is increasing at the rate of BROOD MARE FOR SALE, NEW SLEIGHS. \$6,000 per year. We have had to cut off one customer (the G. T. R.), who has been paying us \$6,000 per annum.

Last summer surgical operations had to be stopped in St. Joseph's Hospital on account of lack of pressure in the water mains, and other public institutions suffered in like manner.

There were many days during the summer when water could not be obtained above the ground floor in the north end FOR SALE—10-H.P. ELECTRIC MOTOR, very powerful. Apply Box 9, Advertise.

E.; Willis Chipman, C. E., and J. M. Moore, superintendent of London waterworks. The total cost of our present system has been \$944,000.

The water commissioners have handed over to the city in cash during the last twenty-three years one million and eighty thousand dollars.

One half the total expenditure to date will double the present supply. Without additional supply we are certain to face during

the coming summer a water famine which might result in the total devastation of the business portion of the city. This would retard our growth and decrease the value of all city property.

Every citizen interested in the welfare of London should vote for the bylaw.
