BISSELL'S REVERSIBLE DISC HARROW

Built in sizes for one or two horses. Will extend out to cultivate under the fruit trees or narrow up to work between grape vines and berry bushes. They cut cleaner and turn the soil over better than any other cultivator. A money-making implement for all fruit growers—a harrow bargain—it will pay you to know more about. The Bissell Agents will give you prices or please write direct to

Eunice Watts

The nests of the fall web-worm (*Hyphantria cunea*) have this year appeared in exceptionally large numbers, not only on orchard but on ornamental trees; also by the wayside and in woods, chiefly on birches and alders, but maples and elms do not escape. When the nests appear in our own orchards, they are at once cut out, and up to the time of writing, about 60 nests have been destroyed. Almost every orchard in this district is infested more or less with these caterpillars, but it is comforting to know that this particular pest has a fashion of becoming abundant in some years and then decreasing to scarcity. However, it is not well to trust to Providence in this way, for if the infested branches are not cut out, the foliage surrounding the nest should be sprayed with an arsenite, otherwise, they may, besides looking unsightly, do considerable damage. In the south there are two broods of this insect, in the north there is but one. When mature the caterpillar descends to the ground, there spinning its cocoon in which it hibernates until next season.

Although the apple crop will not be so great as at first expected, the general opinion is that the fruit will be larger and cleaner than that of last year. Crabs are abundant in some parts.

The very heavy rains have greatly assisted in the swelling of all fruits, and in this part of the province the storms have not done much damage. Wild raspberries and blueberries have yielded enormous crops, and cultivated berries have done well. Fine blackberries were marketed on Aug. 7th. Duchess and Red Astrachan apples were marketed on Aug. 6th.
