Use the Geometric Self-Opening Screw Cutting Die Heads

as a stepping stone to maximum output with minimum expense in thread cutting. We make them in sizes suitable for cutting from the smallest screw up to a $4\frac{1}{2}$ inch bar.

As the dies are opened automatically at the end of the cut, 50 per cent. of the time consumed in backing out solid dies is saved, which also does away with the stripping and marring of threads usually experienced in the use of solid dies.
