SALE OF TWO SHORTHORN HEIFERS AND THREE YOUNG BULLS.—The two heifers and three young bulls shipped by Hon. M. H. Cochrane, Compton, Canada, to Scotland in August, were sold at auction at the sale of Mr. James Beattie, Annan, Scotland, Sept. 8th, at the following prices: Rosamond, by Royal Commander, \$1,864; Boadicea, by Cavalier, \$919; hulls, Wallenstein, by Royal Commander, \$1,050; Floriden, by Royal Commander, \$735, and Flambard, by Sirius, \$525.

Sheep and Horses from Canada.—An experimental consignment of 569 sheep arrived at Liverpool on Wednesday from Guelph, Ontario, by s.s. Lake Megantic, in splendid condition. The venture is expected to prove more profitable even than the shipment of cattle. Forty-six horses, comprising matched teams of carriage horses and hunters, together with about 100 head of fat cattle have also arrived on Wednesday, by Dominion steamer Quebcc.

have also arrived on Wednesday, by Dominion steamer Quebcc.

Sheel from Canada.—Alluding to the fact that two steamers have arrived in the Mersey from Canada, having between them 1,139 head of live sheep on board, the London Globe remarks: "Here, then, we have the commencement of what may prove an almost inestimable boon to the English people of small means. The capabilities of the Dominion for raising sheep are practically unlimited. During the last few years the annual exportation of sheep from Canada to the United States has averaged half a million, and this in spite of the trade being hampered by a 20 per cent. duty. It is estimated that this 20 per cent. more than equals the total cost of bringing sheep from the Canadian ports to Liverpool. Hence they could be sold for the same price in England as they fetch in the United States. This is, we believe, considerably less than existing rates in the United Kingdom, and the effect of such importations, if carried out extensively, must be to bring down our market to a level with the American. It would be too sanguine to expect much relief from this source for some time. A trade of such magnitude as this would need to be to produce any effect on prices could not be established in a day. But, in the present state of affairs, any news is welcome which affords a reasonable hope of a good time coming for people of limited means. The present price of butcher's meat in London is, to a certain extent, prohibitory, unless those who want it go to the trouble of making their purchase at Smithfield Market. There comparatively moderate rates prevail, owing, we believe, to the slackness of trade having diminished the consumption of meat among the working classes. But the rest of the metropolis, almost without exception, remains the victim of an inordinately high tariff, for which no reason is apparent except the joint determination of retailers to maintain existing rates. The public will certainly have every cause to rejoice if this Canadian sheep traffic prove successful.

Ho

Horses from Canada.—We are glad to see that in our present dearth of good useful horses there is some chance of our scanty supply being helped from the colonics, as on Wednesday, October 4, 10 fresh, active animals from Canada, ranging from 5 to 6 years old, were disposed of. They were all quiet in harness, had good legs, and fair action, looking likely to meet the want that is now felt for sound working horses at a fair figure. The prices ranged from £29 8s. to £58 16s., no less than 4 of them causing the hammer to drop for more than "half-a-century." Four more ranged from £40 to £50; so that, if they only turn out as well as appearances would lead us to expect, there will not be much cause to grumble on the part of purchasers, and if they can be sent over and sold so as to pay their way at these figures, a sound horse may not in future be beyond the reach of a man of moderate means. We sincerely trust this sale is only the forerunner of many more.—Specting Gazette.
