

### The Live Stock.

#### THE FAT STEER "SIR ANDREW."

The accompanying Engraving is an admirable likeness of the first prize-taker among the fat cattle at the last Provincial Show. "Sir Andrew" was a high Short-Horn grade steer, three years and a half

old, and shows very distinctly the effect of careful breeding and high feeding. He was sired by "Red Prince," dam "Lucy," by "Guelph," the stock having been previously crossed several times by thorough-bred male animals. "Sir Andrew" carried off the first prizes wherever he was exhibited, viz.: At the Easter Fair, Guelph, in 1869; at the

last Provincial Exhibition in London; and at the South Riding of Wellington, open to all Ontario, at which he took, not only the first prize in his class, but the silver cup, as the fattest animal on the show-ground.

He was sold to Setchell Brothers, Ottawa, at 15 cents per pound, live weight, and weighed when

delivered to the butcher two thousand three hundred and thirty (2330) pounds.

Mr. Armstrong deserves much praise for having bred and fattened so fine an animal, and we hope his example will stimulate others of his fellow-farmers to distinguish themselves in the Show-ring and the market.
