

laid. Bronzed Grackle started to build on April 14th and young were about to leave the nest on May the 20th. Song Sparrow started to build April 15th. Bank Swallow commenced to dig holes on May 8th. Catbird started to build on May 18th. House Wren started to build on May 15th.

On May 12th a Prairie Horned Lark's nest was found at the Experimental Farm containing four eggs. The nest was beside a large dandelion on the lawn in the arboretum. Miss Harmer found a nest of the same bird with young on the 11th. A Chickadee's nest was found by Miss Harmer on the 14th of May in a hollow stump, three feet high and four feet in diameter, the entrance to the nest was from the top of the stump the hole apparently being made by the birds, the nest was about 9 inches from the top.

A Purple Finch's nest was found by Dr. Fletcher near his house at the Experimental Farm on the 21st of May. The nest was in a white spruce tree, about 9 feet from the ground.

On the 28 of May, Miss Harmer found a Blue-headed Vireo's nest at Chelsea. It was only partly built and was composed of finely shredded birch bark, and down, probably brought from some willows near by. The nest was suspended from a horizontal branch of a young maple.
