MACHINE TOOL EQUIPMENT

Get ready to handle all the business that is coming your way.

There is nothing to wait for if you need a Boring Mill

As we can supply you a mill that will admit 37" up to one that will admit 18 ft. in diameter. Our mills have won the unqualified approval of Boring Mill users everywhere.

They meet the most exacting requirements as to quality and quantity of production, wide range of feeds, quick changes, each head entirely independent in all its movements, are some of the things that contribute to their success. Their proportions are such as to stand the strain of long continued hard use.

As regards the quality and efficiency of our mills and the satisfaction they are giving, our reputation alone should satisfy you on that point, but we are not laying back on our oars and depending on our reputation to sell our machines, it is the combination of 40 years of experience in machine tool building with the ability to embody every up-to-date feature that is really an improvement, and above and beyond that to leave severely alone, all freak devices that make some machine tools more fit for a museum than a machine shop, that enables us to keep the best shops in the country equipped with our machinery.

It will pay you to write us for special circulars and descriptive matter
