We believe the profession will at once appreciate the uniqueness and usefulness of this combination.

In all diseases and affections where pain and fever are present, a laxative is almost invariably indicated. This is especially true in the beginning of the various fevers; in acute throat, bronchial, and lung affections; and especially in the acute illnesses of early life.

Attention is particularly called to the therapeutics of this tablet. One of its ingredients acts especially by increasing intestinal secretion, another by increasing the flow of bile, another by stimulating peristaltic action, and still another by its especial power to unload the colon.

To reduce fever, quiet pain, and at the same time administer a gentle laxative and an excellent tonic is to accomplish a great deal with a single tablet.

Among the many diseases and affections which call for such a combination, we might mention la grippe, influenza, coryza, coughs and colds, chills and fever, and malaria with its general discomfort and great debility.

We would especially call attention to the wide use of this tablet in chronic or semi-chronic diseases. Its power to relieve pain, reduce fever, tone up the system, and restore natural activity to the bowels will, we feel sure, make this tablet unusually valuable.
