NEW AND RARE DRUGS.

Placed before the Profession by

PARKE, DAVIS & CO.,

Detroit, Mich.

Extract Duboisia. We are just in receipt of a direct importation of this rare and expensive drug. Duboisia, although scarcely two years before the profession of this country, has already largely supplanted atropia, formerly regarded as indispensable as a mydriatic, in the practice of ophthalmology. Its action on the eye is similar to that of atropia, dilating the pupil and paralyzing the muscles of accommodation, but is much more prompt, and is attended by none of the disagreeable effects of that salt, irritation of the conjunctiva, dryness of the throat, and in children, hallucinations, delirium, etc.

Menthol. (JAPANESE PEPPERMINT). This article, dissolved in alcohol and put up in small bottles, was for a long time sold at extravagant prices in Europe as a secret remedy for nervous headache, and neuralgic pains. Applied over the seat of pain it produces an agreeably warm sensation which is followed by alleviation of the suffering. Applied to the cavity of the carious tooth, it gives prompt relief in toothache. Mr. MacDonald, in the *Lancet*, recommends it for sciatica, and neuralgia, particularly for intercostal neuralgia. It is the basis of the Japanese "Po-ho-yo," or neuralgic remedy. Menthol is also an antiseptic, possessing properties which make it preferable to thymol or carbolic acid in many cases, being less corrosive and harmless when taken internally.

desideratum in medicine. Many of the thoracic affections of treatment is to keep the patient alive until the disease passes, and it is often felt that if the blood could but be purified in such cases Quebracho, from the reports of authentic witnesses (London, Eng.) accidentally made this discovery while the effect of Quebracho was being tried. Subsequent trials have shown it to be of color.

The government of India as a remedy for leprosy, and it has been held in great repute among the natives. It was first found of value in consumption. Mr. Jones, head of the British Consulate in London, continued his observations. He found it to be of great use in other constitutional diseases has established its value as a medicine." Surgeon-Major Balfour says, "there is no doubt that it is a valuable medicine."

is the product of a tree indigenous to the island of Amargosa, (bitter angelim). The root contains eighty per cent. of its weight, which makes it of great value in the form of ointment (40 grains to the ounce), or in the form of a tincture. A distinguished English dermatologist, pronounces it a powerful remedy for leprosy, and an ointment, of a strength of from ten to fifteen grains to the ounce, is a substitute for those commonly employed, and its use is attended by the same advantages as the two latter agents, and at the same time be devoid of danger. Ethidene is introduced as a substitute for those commonly employed, and its use is attended by the same advantages as the two latter agents, and at the same time be devoid of danger. Ethidene is introduced as a substitute for those commonly employed, and its use is attended by the same advantages as the two latter agents, and at the same time be devoid of danger.

The reports which have already been received can justify our action in placing it before the profession. It has aroused our attention, and we have been led in recommending it as a substitute for opium in the treatment of the secretions, and in its leaving none of the deleterious effects of the latter.

It has aroused our attention, and we have been led in recommending it as a substitute for opium in the treatment of the secretions, and in its leaving none of the deleterious effects of the latter.

is a principal in both Brazilian Dispensatories in which it is of a positive kind. So marked is its effects in the syphilitic disease, it is recommended also as an anti-rheumatic, relieving the pain in the joints. In addition to the list of remedies commonly employed in rheumatism, it is recommended as a substitute for opium in the treatment of the secretions, and in its leaving none of the deleterious effects of the latter.

mention the CANADA LANCET.
