

Quotations from Doctors: No. 6

"When the cervix is red, eroded and indurated, when ulcerations are present, accompanied with thick, tenacious discharge; in acute and chronic endometritis; in ovarian, uterine and vaginal inflammations, the liberal use of

produces immediate results.

"In treating the cervix and vagina, I use a lamb's wool tampon, with hot Antiphlogistine. This is packed well against the affected parts and held in place by gauze. Portion of gauze is allowed to protude, as well as the string attached to tampon; and patients given instructions to remove it after allowing it to remain from twelve to fourteen hours."
