

peculiarly happy effect. Particularly is this the case when combined with salol. Salol is a most valuable remedy in many affections; and its usefulness seems to be enhanced by combining it with antikamnia. The rheumatoid conditions so often seen in various manifestations are wonderfully relieved by the use of this combination. After fevers, inflammation, etc., there frequently remain various painful and annoying conditions which may continue, namely: the severe headaches which occur after meningitis, a 'stitch in the side' following pleurisy, the precordial pain of pericarditis, and the painful stiffness of the joints which remains after a rheumatic attack—all these conditions are relieved by this combination called 'Antikamnia and Salol Tablets,' containing $2\frac{1}{2}$ grs. each of antikamnia and of salol, and the dose of which is one or two every two or three hours. They are also recommended highly in the treatment of cases of both acute and chronic cystitis. The pain and burning is relieved to a marked degree. Salol neutralizes the uric acid and clears up the urine. This remedy is a reliable one in the treatment of diarrhea, enterocolitis, dysentery, etc. In dysentery, where there are bloody, slimy discharges, with tormina and tenesmus, a good dose of sulphate of magnesia, followed by two antikamnia and salol tablets every three hours, will give results that are gratifying."

HAY FEVER.—Dr. E. Fletcher Ingals, Chicago, writes: The prescription for hay fever in the Department of Therapeutics in *The Journal*, July 6, 1907, p. 84, and credited to me, I am unable to remember as having recommended at any time, for it certainly is objectionable in several ways: 1st, I have not tested resorcinol in this connection; 2nd, the adranalin chlorid, one-half grain to two ounces, would be very irritating in most cases of hay fever, and 3rd, the boric acid I do not use in this connection, as I find the biborate of soda much better. I have found the following prescription very useful in some cases, and think it well to try it in every case:

R Cocainae hydrochloridi	gm. 15	or	gr. iiss
Sodii Boratis	gm. 30	"	gr. v
Suprarenalin (1-1,000)	gm. 4	"	ʒi
Glycerini	gm. 2	"	ʒss
Aquae camphorae	gm. 30	"	ʒi

M. Sig.: Use a spray to the nose four or five times daily, or oftener if needed.—Clipping from *Journal of American Medical Association*, August 10th, 1907.
