

International Union of Pure and Applied Chemistry

International Union of Pure and Applied Chemistry, under the terms of the International Union of Pure and Applied Chemistry, is hereby established as a permanent organization. The purpose of this Union is to promote the advancement of chemistry in all its branches, to foster the cooperation of chemists from all countries, and to maintain the highest standards of scientific research and education in the field of chemistry.

The Union shall be composed of all countries, and shall have the right to elect members from all countries. The Union shall be organized into a General Assembly, which shall be the highest authority, and into a Council, which shall be the executive body. The Union shall also have the right to elect a President, who shall be the representative of the Union in all international matters.

The Union shall be responsible for the maintenance of the International Union of Pure and Applied Chemistry, and shall have the right to elect members from all countries. The Union shall also have the right to elect a President, who shall be the representative of the Union in all international matters.
