

to establish a valid methodology for assessing the effectiveness of Canada Manpower Centre. Long Canada Manpower Centre has been consistently selected for this test. The experiments were carried out in three countries and particularly in the United States Employment Service to compare the quality of the services that their manpower centres offer with that of the Canadian centres (2.0). They may prove useful in developing an approach reliable for the evaluation of Canada Manpower Centre operations.

The next step in the evaluation of the Centre is to determine the extent to which the Centre has improved the quality of the services it provides. This is to be done by comparing the Centre's performance with that of the United States Employment Service. One of the major reasons for the Centre's success is that it has established a quality control for its own placement operations. It is explained that "while the Department intends to develop and establish an on-going placement review evaluation process, the implementation of the CMC control system will be completed with immediate effect."
