As Aid. Wallace, chairman of the committee. is secretary of the Standard Sanitar Manufacturing Company, one of the concerns which would be benefited by the opening of the alley, he came in for some personal criticism from Mr Wardrope. H. N. Kittson, of the W. H. Gillard Company, representing the interests which desire the opening alley, accused the lawyer of falsifying the facts in presenting the case, and argued that the matter was a quesof whether or not the Y.W.C.A. which was running a boarding house in a busy section, should be allowed to stop the progress of the city. He said that his company had been very considerate of the association and had subscribed \$1000 to the institution. To the latter remark Mr. Wardrope re joined that he was treasurer of the Y.W.C.A., and he had not seen the money. He indignantly denied falsifying the facts in the case, and beg-ged leave to submit certified copies of deeds to the property, the titles to which it was claimed he had misrepresented. The pros and cons in the case seemed likely to keep the question before the committee for some time, when Chairman Wallace settled hings for the time being by announce ing that the committee would take the matter under consideration.

Didn't Get the Increase. The garbage collectors sent in a request for an increase of pay. They are receiving \$2 a day, which is considered good pay for drivers in this city. The committee decided that as the men had been on the work only a short time it was too early to consider

the lungs, bronchial tubes, stomach, inof the body are affected.

A splendid remedy, attended with re-

markable success in curing Catarrh, has lately come prominently to the front. Its name is Catarrhozone, and no case is recorded where it failed to quickly relieve and cure.

The strong points about Catarrhozone are that it is both a local and constitutional treatment. It not only affords quick relief to the local sympoms, but also purifies the blood of all Catarrhal poisons, builds up and strengthens the system.

Inhaler supplies an abundance of medicated air which is breathed in at the mouth, and after passing through every air cell and air passage of the breathing organs, is wly exhaled through the nostrils. This penetrating, volatile antiseptic once kills the germs that cause, Catarrh, and prevents the disease spreadwhen once established. It is so aling and soothing that the inflamed branes and sore spots are restor-

ROMANCE APPEALED TO THEM.

MONTREAL, June 6 .- Second-class passengers of the Allan Line steamer Grampian, which arrived in port this morning, were the guests on Sunday night of the officers of the vessel, at a dinner, which was tendered on board to five young Scotch women on their way to the west via Montreal, to be married to their sweethearts, who had preceded them from the old country to prepare the homes.
