Still, but-there is a but in the matter. Psychical Research, the "highbrow" form of spiritualism in both Britain and the United States, has been making a deal of progress in the last quarter of a century. Poets like Rupert Brooke may echo Browning in making game of the society's "proceedings," and yet the society has on its roll of membership, or associated with its work, some of the greatest names in science and philosophy. It is rather curious that certain eminent poets should have nothing to do with such study, while scientists, keen and hard-headed, Crookes, Lodge, Richet, Morselli, Andrew Lang, or philosophers like Myers, Hyslop and William James, or business. men like W. T. Stead, the shrewd journalist and social reformer-one easily groups together in one list the living and the dead in this connection-should be deeply interested in the investigation of relations between the natural and spirit worlds. A great difference appears between Sludge and Lodge, as Browning may now recognize "over there."
