J. P. Bickell & Co. say at the close:
Wheat—Weak foreign cables and better
weather conditions resulted in lower opening, but support by leading long interests
and oversoid condition among pit shorts,
caused good rally, closing 1c lower to 1/2
higher. Cash demand continues slow, but
short interest in futures is enormous, and,
as crop advices are far from flattering,
we consider position of futures at ruling
discount an attractive proposition. On
all declines buy September wheat.

Existence Perkins & Co. say at the close:

all declines buy September wheat.

Erickson Perkins & Co. say at the close: Wheat—Market opened weak, with scattered selling of long wheat by commission houses, in which stop-loss orders played a part. Some of the buying of September wheat to-day would indicate that more people are beginning to believe in crop deterioration. St. Louis reports sale of 25,000 bushels of cash wheat for milling, and demand not satisfied. Minneapolis stocks decreased 230,000 bushels for four days. We believe that the market has again seen low point on this reaction, and that the character of the crop news comagain seen low point on this reaction, and that the character of the crop news coming in warrants a belief in higher prices. Corn—The cash demand was poor, and prices early were ½c to 1c lower. We cannot advise the long side of corn until this situation changes.

Oats—Market opened weak and lower with other grains, and from the same causes, and rallied proportionately. Crop news favorable.

causes, and railled proportionately. Crop news favorable.

Provisions—The bearish hog news made provisions—The bearish hog news made provisions easy and lower early, when a moderate volume of scattered long selling took place. Later demand from shorts, led by grain traders, brought about a good rally, and a steady closing at fair gains over yesterday.

soft earth or a piece of sod and on that a layer of fine hay or straw. Make it slightly concave, but not so much that the eggs will press upon one another.

Put insect powder in the nest and on the hen and give her a thoro dusting once a week while sitting.

Your Daughter's Health Her Burden - Your Burden

This is true—sickness not only wrings the heart, but adds burdens that in most families bear upon the minds and comforts of each member of the

"My daughter," writes Mrs. H. B. Sudder, "grew into weakness instead of that full measure of strength that is the desire of every parent's heart. Clever at school, she loved study, yet her strength was too slight. Because she was ambitious, she was always tired. She never ate heartily, was pale, thin and except when striving for school honors was listless of the interests and feelings natural to young girls. The burdens of ill-health she carried were my burdens too, because I fretted lest some serious malady hight seize her and take her from me. "Ferrozone brought to her and me the first gleam of satisfaction. How that girl did enjoy her food after the first week she used Ferrozone. Her trale thin cheeks began to show a gimpse of red, and her strength improved. I think she could have gained more, but I was afraid that she might

over-do. The more she did the strong-er and ruddier she got, for Ferrozone renewed her blood and gave her muscle, flesh, strength and nerves."

There is no tenic that will uplift, vitalize, strengthen and rebuild young girls and women like Forrozone; thousands say so—try it—the benefit it will ingreen level to picture, are on the do you in many ways is beyond tell—verge of consignment to memory, and ing. Body Found in Water.

Sough, a Pittsburg farmer firm.

chicks is at present a matter of some ever will be a general agreement as to the one best method. One condition, however, appears to be imperative, and that is that the young things be not allowed to overeat.

THE BIG BUSINESS OF BEEF.

Let fancy endow Adam with the gift of eternal life. Start him, the day of his creation, to piling up silver dollars at the rate of a dollar a minute Permit him to work incessantly eight nours a day the week long down the ages. He will lack \$663,000,000 of having enough money to pay for all the live cattle in the United States in the

year 1910. Such is the magnitude of the be industry. The annual report of the department of agriculture issued a few days ago, indicates that there are 96,658,000 cattle in the country. At the estimated increase in population over the census of 1900 this provides a cow or a bullock for every human inhabitant, adult or minor. It is but hatural that the citizen

should manifest interest in ascertaining what becomes of this beef. his right to be informed that the source of his beefsteak is rapidly dimishing, that the number of cattle de-creases on a ratio with the increase in population, that the great cattle ranges, which the late Frederic Remthing we call "cost of living."

of Ontario Department of Agriculture.

The following bulletin has been issued by G. Lockie Wilson of the Ontario Agricultural Department: Ontario farmers who have gone int Ontario farmers who have gone into a lafalfa experiments generally have proved beyond the shadow of a doubt that this is the best paying fodder crop that an agriculturist can grow.

Alfalfa has been known since 490 B.C. and was successfully grown in Greece and Rome nearly 2500 years ago. In the State of Kansas there were in 1891 30,000 acres grown, while last year nearly a million acres of alfalfa were under crop, resulting in untold financial benefit to the farmers of this state.

viz., American, Tuskestan, Arabian, Peruvian and German, but for Ontario the American variety is best suited.

Alfalfa, unlike many other crops, enriches the soil rather than impoverishes it. The roots extend into the earth from five to twelve feet, reaching down and bringing to the surface ni-

of a plant runs from 14 to 20 inches. When about one-third of the crop is in bloom is an excellent time to start cutting, as it then possesses its greatest food value. The cutting should be done in the forenion, when the dew is off the grass and the tedder should folon the grass and the tedder should fol-low immediately and be kept at work until late in the afternoon and the crop-left in windrows. This process should be repeated the following day and the hay put in coils and left for several days. It should not be cut too close to the ground, as the plant may be in-jured thereby.

The yield per acre of green crop is about 20 tons, and of dry hay five. It

about 20 tons, and of dry hay five. It should not be allowed to remain too long in the hot sun, as the leaves are liable to become dry and break off, and they contain most valuable nutrients. Seed is produced best from either first course and guerages five of ond cuttings and averages five

or second cuttings and averages five bushels per acre, altho it sometimes runs as high as ten.

Alfalfa hay contains about 50 per cent more digestible protein than hay made from red clover. It makes a splendid pasture for horses or hogs, but care is required when sheep or cattle are turned in, as there is a tendency to bloat if allowed to eat too much, especially when the grass is wet.

An application of about 12 loads of

barnyard manure per acre every four years has proved very satisfactory.

Fertilizers containing phosphate have given the best results. When a field of alfalfa is plowed down the surface Doctors Get \$500. soil is completely filled with roots rich in fertile elements.

It is to be hoped that every farmer in Ontario who has suitable well drained soil will put in a field of this most desirable crop.

B. & O. INCREASES WAGES.

BALTIMORE, Md., April 27.—The Baltimore and Ohio Railroad Com-pany have granted an increase of 6 per cent. to all employes receiving \$200 or less per month, excepting those affected by agreements recently aron the hen and give her a thoro dust- rived at. Between 50,000 and 60,000 persons will be benefited.

## CONFERWITH FRUIT MEN ON MUNICIPAL MARKET

Bulletin Issued by J. Lockie Wilson Controller Foster's Special Committee Down to Business-\$500 For Medical Convention.

> away for two years, the question of a municipal fruit market was taken up yesterday by the special civic committee appointed at the instance of Controller Foster. It was decided to have Property Commissioner Harris report on available sites, and to have a conference next week with representa-tives of the wholesale and retail fruit

dealers and producers.

Controller Foster explained that the Grand Trunk had once offered to spend \$4000 in improving the present fruit market at Scott and Esplanade-streets but that the market was hopelessly antiquated. Fruit men should be un-der no obligations to the railways for

Ald. David Spence, who is a whole saler, declared that the existing quar down and bringing to the surface nitrogen and other valuable mineral plant food. It has been grown continuously on a farm in one of the counties of this province for nearly thirty years and still produces gool crops. It can be grown successfully on sandy, heavy clay loam or on nearly any variety of soil properly drained. Successful experiments with it have been conducted on a limited scale with successful experiments with it have been conducted on a limited scale with successful experiments with it have been conducted on a limited scale with successful experiments with it have been conducted on a limited scale with successful experiments with it have been conducted on a limited scale with successful experiments with it have been conducted on a limited scale with successful experiments with it have been conducted on a limited scale with successful experiments with it have been received for the issue of \$100,000 5 1-2 per cent. bonds running from three to ten years. The estimated investment expense is \$216,000 and the estimate net earnings, which are figured on a conservative basis. If sown with a nursing crop, barley at the rate of one bushel per acre is an excellent one for this purpose. Eighteen or twenty pounds per acre of alfalfa is the proper quantity of seed. From the coordinate of the project by an offer to erect a suitable, large building and the estimate net earnings, which are figured on a conservative basis. Trunk offen allowed consignments of fruit tande for the bonds at maturity, and with a period on a conservative basis. Trunk offen allowed consignments of fruit tande to pay one cent a crate on fruit landed from the boats the number of applications for reservations for its pay one cent a crate on fruit landed from the boats the number of applications which have been received for the issue of \$100,000 5 1-2 per cent. bonds running from three to ten years. The estimated investment expense is \$216,000 and the estimate of successful provision to return the provision of the project by an offer to erect the air. After the railway had repaired the roof and patched the building up, it had refused to let the fruit ing. At present the Grand Trunk had most of the local fruit trade, but the Canadian Northern was bound to become a dangerous rival. The Grand Trunk often allowed consignments of fruit to lie untouched for hours on the platforms at intermediate points, when they could easily be picked up and carried to Toronto. The radials should be given all facilities for entering the civic market.

"When the radials enter, the whole"

be given all facilities for entering the civic market.

"When the radials enter, the whole complexion of the fruit trade will be changed," declared Mr. Harris. "They will bring in 90 per cent. of the fruit coming to Toronto."

Controller Foster's idea is that the market should be located on the north side of Bayside Park.

Want Referendum Principle.
At the meeting of the legislation and reception committee, Ald. Phelan spoke in support of his plan of adopting the principle of the initiative and referendum, which has apparently proved a success in a number of western U. S. cities. He aims at getting legislation whereby, on a sufficiently signed petition being presented, it would be obligatory upon the city council to consider any matter named, or submit any bylaw or referendum

which might be called for. The mo tion was allowed to stand for a report by the city solicitor.

The complaint of Ald. Phelan that the aldermen are not kept sufficiently posted by the civic officials on the progress of work in the respective de-partments, impressed the committee, Ald. Maguire pointing out that, altho the construction of the filtration plant had been going ahead all winter, no information had been supplied their

A grant of \$500 towards entertaining venile Dr. Riordan said that between 800 and 1000 visitors were expected, including some distinguished medical men from England, the United States and British Columbia, and that the local committee had arranged to spend about \$2,000.

Before proceeding further with the proposed bylaw to compel slowly moving vehicles to keep close to the curb during the summer months, a conference will be had with the teamsters. commended that the contract for the siphon to carry the trunk sewer under the Don be awarded to Ryan & Reilly

of Philadelphia. Mayor Geary announces that he will oppose the works committee's recompendation that a 42-foot pavement be laid on St. Clair-avenue, thereby sealing the doom of widening that thorofare. He said he had become fully convinced that the widening was in the public interest, and should not be charged as a local improvement.

Where City Hall Is. Information that should be valuable visitors in finding ther way the city hall is supplied Dominion Meteorologist Stupart, who has determined that the 22 minutes 54 seconds longitude. Controller Spence wants a sun dial ompass placed in front of the city hall and Mr. Stupart's statement in- ings. scribed on the stone column of the lower steps, so that the scientifically minded can figure out the time.

TAX ON COLONIAL FLOUR

LONDON, April 27.-The Canadian Associated Press understands that a duty will be imposed on colonial flour. The Tariff Reform League welcomes immunity from taxation of colonial wheat, and has pledged itself to support this policy.

It will materially lessen the chances of milk fever if care is taken to see that the milk is all drained out of the udder. If there are any lumps in the udder, rub with water as hot as the hand will bear, rubbing and kneading thoroly.
