TESTS OF SEEDS.

Agricultural College Will Supply Samples Free

To Those Who Want to Experiment-Send at Once for Any of the Following Varieties.

d were distributed in small quantities.

The present system of co-operative experimental work in agriculture was
tarted in 1886 with sixty plots, which
sere situated on twelve different
arms in Ontario. Since that date,
lowever, the work has increased from
ear to year, and in 1897 there were
ere 11,497 plots, which were situated
a 2,833 farms.

Interested persons in Ontario, who
ish to join in the work, may select
ny one of the experiments for 1898,
and inform the director at once of the
hoice made. All material, will be
trainished entirely free of charge to
chapplicant, but he will be expected
conduct the test according to the
structions sent with the seed, and
report the results of his test as soon
possible after harvest.

EXPERIMENTS FOR 1898.

Test nitrate of soda, superphosste, muriste of mystaria.

EXPERIMENTS FOR 1898.

It rest nitrate of soda, superphosate, muriate of potash, mixture, and some with corn.

I resting nitrate of soda, supercosphate, muriate of potash, mixture, d no manure, with mangels.

Growing three leguminous crops regreen fodder.

Growing three mixtures of grain green fodder.

Testing four varieties of millet.

Testing four varieties of clovers.

Testing four varieties of clovers.

Testing three warieties of clovers.

Testing three varieties of clovers.

8. Testing three varieties of clovers, wheat.

9. Testing three varieties of spring wheat and one variety of spring rye.

10. Testing four varieties of barley.

11. Testing five varieties of oats.

12. Testing fur varieties of cartos.

13. Testing three varieties of cartos.

14. Testing fur varieties of cartos.

15. Testing four varieties of cartos.

16. Testing two varieties of mangels and one variety of sigar beets.

16. Testing two varieties of Sweedish and two varieties of fall turnips.

17. Testing six varieties of corn.

Material for either No. 1, or No. 2 experiment will be sure by express, and for each of the others by mail. The supply of material being limited, those who apply first will be surest of obtaining the desired outfit. It might be well for each applicant to make a second choice, for fear the first could not be granted.

Particular varieties need not be mentioned, as all the kinds to be distributed are those which have done exceptionally well upon the trial plots in the Experimental Department.

MR. CONMEE'S AMBITIONS.

French Scientist Fears That Population
Will Increase Too Fast.
The marquis de Nadaillac, a French
scientist, tolerably well known here
through his, work on "Prehistoric
America," has been recently engaged
in calculations that are curriously and America, has been recently engaged in calculations that are curiously suggestive. They concern the dangers of health. Since the memory of man runs not to the contrary, or, more definitely, since the late Jeremy Bentham inaugurated the doctrine of the greatest good of the greatest number, there has been an effort, tentative yet perceptible, to get things ship-shape, to provide through arbitration against war, to improve sanitation, to fell disease, to foster matrimony and simplify existence. One does not need to be prophetic to assume that ultimately the effort will succeed. But consider the result. What with universal peace, universal sanitation, the fanging of the microbe and continuous matrimony, in no time at all—in two centuries at most—De Nadailiac declares that the earth will be overpopulated and that there won't in calculations that are curiously sug Nadaillac declares that the earth will be overpopulated and that there won't be enough food to go around. If he is right, then, indeed, the struggle for life will begin in earnest, and not of individual with individual, but of nation with nation, a stuggle such as history has never known and which will result in the survival of the fittest—providing always survival there be. It will be the clash and clatter of empires and republics contending, not for principles, but for bread; a sigantic upheaval in which whole races will disappear, and all because humanity is in love with an ideal that is not in love with it, because peace is not a blessing and because the microbe is a boon.

RUN OVER A SCARECROW.

Engineer of a Fast Train Receives a Fright Which He Can't Forget. (From the Detroit Free Press.)
"The nervous strain on the engineer of a fast train is something enormous," said one of them the other day. "Not only the lives of the passengers are at stake, but there is constant fear of running over someone on the track. An accident, no matter how innocent the engineer, is always a kind of a the engineer, is always a kind of hoodoo. What was my first accident hoodoo. What was my first accident? I shall never forget it. If it had been traced on my mind with a streak of lightning it couldn't have made a more lasting impression. It happened one bright moonlight night in November. We were spinning over the rails at full speed across the country where there were few people passing at that time of night, when I looked out and saw the figure of a man lying across the track not ten feet in front of the engine. I stopped quick as possible, but too late, not ten feet in front of the engine. I stopped quick as possible, but too late, of course. We had run over him and the lifeless body was under the wheels. We got out to look for him and fouad his hat, a piece of his coat sleeve and one of his shoes, but the rest seemed to be further back under the train. I hacked up the engine and got out to look again. There lay the body. I nearly fainted when I saw its distorted form. I felt like a murderer. Did I know the man? No, not personally. He was a scarcrow from a neighboring corn field."

Definition.

Tommy—Paw, what sort of a fighter is a "cyclone fighter?"

Mr. Pigg—I don't know much about fighters, but I suppose he is one who goes blowing around.—Indianapolis Journal.

goes blowing around.—Indianapolis Journal.

Feeting the Earth's Fuise.

The fancital notion which men used sometimes to entertain that the earth is 'e some some a living thing, would probably have derived support from the recent observations of Prof. John Milne, and others, on the shivers and quivers that frequently run through its rocky frame, but escape notice except when watched for with specially constructed and exceedingly delicate apparatus. Prof. Milne reports that apparatus of this kind has now been mounted in Canada, the United States, South Africa, New Selland, Java, India and Argentina, as well as in Great Britain and at many places on the European continent.

I frolks 'ud mind their own affairs, An' let their neighbors suffer, We wouldn't hear so much compl O, times a gettin' tougher.

TO MYSELF.

Let nothing make thee sad or fretful,
Or too regretful,
Be still;
What God hath ordered must be right,
Then find it in thine own delight,
My will.

Why should'st thou fill to-day with

Only be steadfast, never waver,
Nor seek earth's favor,
But rest;
Thou knowest what God wills must be
For all His creatures, so for thee,
Tis best.

COUNTRY LONGINGS.

COUNTRY LONGINGS.

Away, away from the busy town.
Away from the haunts of men:
Away, away where the mountains
frown
On vale and wood and glen:
Away, away on the boundless sea,
I am tired of this cold world's ways,
I am tired of this cold world's ways,
I am tired of its senseless mockeries,
Of the treacherous part it plays:
I long for the seent of the wilding rose,
For the sound of the babbling brook,
I long for my town-tired eyes to close
In some woodbine-shaded nook.
Away, away from the cold world's
reach,
Away from its pleasures vain,
Away on the sunny, shingly beach
By the boundless, seething, main,
To bathe my lips in the silver rills,
My brow in the snow-white spray,
To live 'midst the woods, the glens,
the hills,
Away from the town, away.

the fraud of the day. Ask for Carter's,

HAMILTON, ONT.

SLOANS' INDIAN TONIC

If all the old maids in the world Wuz rich as Julius Caesar, I hain't a doubt the sourest one, 'Ud find some fool ter squeeze 'er.

Should be sorrow,
Sour to-morrow,
My heart?
One watches all with care most true,
Doubt not that He will thee, too,
Thy part.
