depth was found to be twe

1 the

and the width eight feet. Site exist in the neighbourhood, traced for several miles. Not the least interesting discovery is the evidence of tiquity of the workings, were growing upon the ei-copper, proved to be four h-old! Beneath it were tru-that had previously decayed and the whole depth of soi process of time had accur the large mass of copper moved from its place, som and is now in the Nationa Washington. These momentos of anci-industry are deserving of me passing notice. They may u-had cached a higher grade wandering tribes that have so The Indians now living in how nothing of the people undertaken. They evince effort which does not now their present feeble efforts in is somewht singular, that am so observant and persever of iron remained so whol since some of the ores, wi vast alundance, and upon in the Carp fiver region, ar of the use of iron might he destiny of that people, said to have done of the re-triumph, in pride of art and their almost perished memo

triumph, in pride of art and their almost perished memor Arta: Disarta is New Yor neident occurred on Sunday alies in the corner stome of a new C to New York, at the corner of E would of Moday, that the Kight Rev. World perform the services of the L would of the basement had hen by the dreet the timbers. About 4 of hundle to one thousand persons for dreet services of the key the the services of the vells about 6 or dreet services of the key to had one of the services of the L would be fully brick, and services of twelve feet, and agains would be fully brick and the services of the distribution of the services of the City Horpital. On had caten for dimets were no outward life atom after, methanis from as the fully the sease of the the had be of the dimension for the service of the distribution al life of per-tore the New York Star of the same and the sease of the service of the the ham Dirick. In Sth we consider and the fueld on the search of the set of the the distribution al life of per-tore the New York Star of the same the fueld with both legs brokes. Another, in Sth we consider and Hou blott, but not services of the same the the search of bowers and Hou blott, but not services of the same the period, but it is not yet asset.

Dr. W. P. Evan's Pat

Dr. W. P. Evans's Plat No medicine has been discovere pily scopied to the internaly as d and yet perform auch wonder whe nearly, eas want, bait, or by friction "THIS PAIN KILLER" may success that will astorphic the behold the side astormach, Corne. Co Cholera, Infantum, Bronchice, H unan of beast. Children Testhing, Raising Blog Quinsey in a few hsure. Childbains Branne, prevent a Blater from Braze, Measter Cramps, hurs, a Flash, blas of sunge.

Spasma, prevent a Blater from Breasts, Measles, Cranps, hurs, s Flash, bits or stings. In very fool stomschait may ca So such the better, the stomach and the next does will settle the air Cartificarts to fill a volume son of , showing the wonderful effect Killer' but they are too common efficiency of no merit. We insert bu are to be depended upon :--This will be rest to be the son er is my family for headache, too tam, dynamity, doe and believe it medicine. JULY Thave used the " Pain Killer"

There used the "Pain Rille" found in applying it immediately, blinter. Twould recommend it of the public. Editor of the Westfield Stan There been esting the Pain R monthe past, and find that it gives it on a recommended. There use family also, and believes it to be family medicines now in use.

This will certify that I have used in the family for the last its months my that it has proved the bast fam have ever used, especially for cong-brings. I take pleasure in recom-pable. And the set of the set of the set have the set of the set of the set have the set of the set in well known that CHLOR my that it is well known that CHLOR my that it is not known that CHLOR my the set of the set of the set of the set have the set of the set of the set have the set of the set of the set have the set of t

Kolmstock's Vern SYMPTOMS OF W

Alternate palences and disching tance, a dial expression of the ey-rething of the nove, a sweited up whitely forred and thickly speckled forted brenth and enlarged belly. A rel sweiting or putfices of the skin,
