## Goodyear Tire Mileage Costs You Less Than Before the War

Goodyear Tires cost you less per year or per mile than they did before the war.

The price of Goodyear Tires in that time has increased less than 2% on some sizes, and only 15% on any size—while most commodities have increased over 100%.

We have been able to keep down the price of tires largely because of Goodyear's economical system of distribution (direct from factory to Service Station, saving jobber's profit and reducing shipping cost).

This slight increase is overshadowed by the greater mileage made possible by increased Goodyear Quality and broader Goodyear Service.

Owners now report cost-per-mile much below that of five years ago.

You, too, can secure fair Goodyear prices and long Goodyear mileage by calling on the nearest Goodyear Service Station Dealer.

THE GOODYEAR TIRE & RUBBER CO. OF CANADA, LIMITED

These are examples of Goodyear mileages above the average—mileages impossible six years ago. The increased Goodyear quality and broader Goodyear service which have made possible these greater mileages will also enable you to keep down your tire costs.
