It is not so difficult to plant new truths as to root out old errors; for there is this para-dox in men, they run after that which is new, but are prejudiced in favor of what is old.

There ought to be such an atmosphere in every Christian church, that a man going there and sitting two hours should take the contagion of heaven, and carry home a fire to kindle the altar whence he came.

There exists in human nature a disposition to murmur at the disappointments and calamities incident to it, rather than to acknowledge with gratitude the blessings by which they are more than counterbalanced.

Times of general calamity and confusion have ever been productive of the greatest minds. The purest ore is produced from the hottest furnace, and the brightest thunderbolt is elicited from the darkess storm.

The Richmond Whig requests all the Southern papers to urge on the people the necessity of working the lead mines in Virginia and other States of the South, as the supply of the Confederate army is giving out.

A public trial of chain cables lately took place at Tipton, England, at the chain works of P. P. Parks. Four sizes of links were proved; the smallest $\frac{1}{2}$ -inch, the second $\frac{3}{4}$, third $\frac{7}{8}$, and one-inch. The first broke with a pressure of 8 tuns 10 cwt., the second with 17 tuns: the third, 28 tuns; the fourth 32 tuns.

On Saturday evening, 27th ult., a young man named Marcel Sabourin, belonging to the Musical Society of Longueuil, and one of a party of excursionists to visit the Great Eastern, fell overboard from the steam St. Lawrence and was drowned, At the time of the accident the steamer was opposite the Parish of D'Archambeault.

We learn by the arrival of the barque Ferdinand and Louis, at the port of New York, that a barque, supposed to be the Ardennes, of New York, was captured off the coast of Africa by her Majesty's steamer Wrangler, with about five hundred slaves on board, and taken into St. Helena, on the 1st of June last. The slaves were landed, and the barque was being broken.

you want to protect YOUR BUILDING and FAMILY from injury or harm by Lightning, secure immediately Professor Morses Large Size Twisted Rods with platina points and PATENT INSULATORS, which are warranted to be a perfect protection against injury from Lightning.

As some Buildings have been struck and burnt by Lightning with Rods on, many

falsely contend that they are no protection, without considering the Size of the Rods, the kind of insulators and the imperfect way they are put up. Take an imperfect ELECTRIC MACHINE without good insulators and it will not work, neither will the Magnetie Telepraph operate correctly if any part of it is not properly put together. And so it is with Lightning Rods. Get the small cheap Rods and inferior points and insulators, and your building will be sure to be struck by lightning, as they will attract the electricity but are not sufficient to carry it off. But if you want your buildings protected, call on the Subscriber for PROFESSOR MORSES' LATEST PATENT INSULATORS AND POINTS, and the large TWISTED RODS, and your buildings will never be struck by lightning.
