

# Van Brunt Drill

## Make Perfect Seeding in all Soils

The "VAN BRUNT" is in that class of Farm Machinery that represents the very best quality and the very highest character of skilled mechanics that can be employed in the manufacture of Agricultural Implements.

### The Van Brunt Adjustable GATE FEED

is adjustable to any quantity of grain or kind of seed without change of gear. It will handle with perfect uniformity every kind of grain and seed that can be planted with a drill.

This ADJUSTABLE GATE (found only with VAN BRUNT) is one of the most important seeding machine inventions of recent years. It regulates the height and size of seed outlet to the size and kind of seed (see illustrations).

There is no leaking. The seed case is cast in one solid piece. All other parts are fitted into place accurately at the factory and made tight.

#### Forward Delivery

Seed is delivered near the centre of the disc where the furrow is wide open. Closed disc boots convey the seed down into the furrow without being deflected by coming in contact with the upward turn of the discs.

#### Other Superior Features

Tilting levers provide for adjustment to suit different size of horses.

Double feed device. Each feed drives half the machine.

Gear drive—no chains to work loose or wear out.

#### Regular Position

Fasten all Gates Latches on left side to all kinds of small grain seed.

#### For Coarse Seed

Fasten all Latches right side to sow Peas, Beans, Corn or Beans Out.

#### To Clean Feeds

Loosen the Latches, disengage the Gates and raise the Drill Pole to clean the Feeds.

### Van Brunt Drills

Will do first class work in soil that can be seeded, and will not clog or choke in mud, gumbo, sticky or trashy ground. All Disc Bearings that wear out will be replaced free.
