"DURABILITY IN SERVICE"

IS A WELL-KNOWN CHARACTERISTIC OF

FROST & WOOD

IMPLEMENTS.

Alma, Assa., Sept. 2nd, 1903.

The Frost & Wood Co., Ltd., Winnipeg, Man.:

Dear Sirs,—I bought one of your binders at Alameda in 1899, and have just finished cutting my fifth crop with it. I cut from 120 to 140 acres every year and never found it necessary to touch or change the binding attachment, and in all that time the machine has never missed tying a sheaf, except when the twine was bad, nor has it cost me over 50 cents for repairs. I got a mower the same year, and it has given me just as good satisfaction as the binder. I am well satisfied with both machines.

Yours truly, (Sgd.) JERRY FOY.
