

Technique of Operations on the Bones, Joints, Muscles and Tendons

BY ROBERT SOUTTER

A.B., M.D. (HARVARD)

Instructor in the Harvard University Medical School; Assistant Surgeon to the Children's Hospital, Boston; Surgeon-in-Chief to the House of the Good Samaritan; Surgeon to the Long Island Hospital, Boston, and to the Massachusetts State Hospital, Canton, etc.

Cloth, 8vo. 504 illustrations. Price \$4.50

This unique work contains only the most carefully tried methods for each condition. The Army Surgeon will find it unusually helpful. Diagrams and descriptions are given of many uncommon pieces of surgical apparatus which are useful in complicated conditions and in operations on fracture, while methods in after-treatment, which are essential in securing the best results, are also given. The author also describes operative measures to correct deformity, to improve function, and to restore locomotion in paralysis resulting from wounds or from disease.
