

The Time of year for ANGLING, as described by  
Mr. HENRY NEEDLER.

THE months o'er which the nearer sun displays  
His warmer influence, and directer rays,  
Are most propitious to the Angler's toil,  
And crown his labours with the largest spoil.  
When birds begin in brisker notes to sing,  
And hail with cheerful voice returning spring;

New Moon 4th Day, 8h. om. afternoon  
First Quarter 12th Day, oh. 55m. afternoon  
Full Moon 19th Day, 3h. 37m. morning  
Last Quarter 26th Day, 6h. 51m. morning
