GREAT LOVE .- God so loved the world, with love so vast, so rich, so amazing, as to pay down for its ransom a price so great, that it defies all the powers of calculation possessed by man or angles to compute the amount. In this love there is a beight to which we cannot soar, a depth we cannot sound, a breadth we connot grasp, a length which no line of ours an measure. - Robe it Newton.

The invention of that Superior and Complete Sewing Machine (The Family Sewing Machine), marks one of the most important eras in the history of machine ery, and when we consider its great use fulness and extremely low price of (\$25) it is very difficult to conceive of any in vention for domestic use of more or even equal importance to families. It has great capacity for work; beautiful, smooth and quiet movement, rapid execution certainty and delightful ease of operation, that commends it above all others. The working parts are all steel, strength and durable, and will last a life time, the bobbins hold 100 yards of thread; the stitch s the firmest (f all the stitches made, neat and regula , and can be regulated in a moment to sew stitches from an inch in length on coarse material down to the finest, so infinitesimal as to be hardly discernable with the naked eye, and with rapidity rendering it impossible to count them it has more attachments than any other, and it does to perfection all kinds of heavy, coarse, plain, fine or fancy needle-work with ease, and far less labor than required on other machines, It needs no commendation, the rapid sales, increasing demand, and voluntary encommums from the press, and the thousands of fam-5 00 uies who use them. amply testify to their un loubted worth as a standard and reliable household necessity, extending its popularity each day.
