**STUART STRATHY,  
General Manager.**

1907.

In order that the Canada Milling Company may form an estimate of the quantity of barley that will be required for seed, it is important that those requiring this seed should specify at an early date what their requirements will be.

At the present time it is difficult to state what the cost will be, but this information can be supplied later. In the meantime farmers are requested to send direct to the Canada Milling Co., or through our agents particulars of how much seed barley they require, and the date they would like this shipped from Winnipeg.

This company will apply half its regular mileage grain rates on such shipments from Winnipeg to stations on our line. These rates will be much lower for carload lots than for smaller quantities, therefore, if a number of farmers, who want seed, will club in together and place orders for a car of, say 1,000 bushels, the cost of transportation from Winnipeg to destination will be considerably reduced. For that reason it is in the farmers' interests that they should go in together and make up a carload.

If this barley is desired to be shipped in sacks the extra cost of the same will be added. The railway company's agents will be authorized and directed to distribute the barley to each person and collect for the cost of the same including bags and the freight charges. Under this arrangement the farmers will be saved the trouble of remitting to Winnipeg the cost of the barley.

F. W. PETERS,  
Asst. Freight Agent.
