TIME FOR ACTION

'The unseating of Finance Min's-

The Mail and Empire commenting on the unseating of Hon. Mr. Field ing, Minister of Finance, has the following to say editorially

ter Fielding for corruption practiced in his behalf in the election of 1001 is but a small instalment of justice. Nova Sotia was carried by corrup tion distinctly planned by the Gov ernment machine in the last campaign. If the law were administered w thout technicalities scarcely one Ministerial member from the Province would retain his seat. Mr. Fielding is the one man to receive pun shment out of the many who deserve it. Information from Halifax tells of the method pursued by the Laurier agents for the carrying of the province. The persons receiving favo s from the Government or collecting the "rake-off" on artioles sold to the country were evidently required to subscribe to a

dently required to subscribe to a general fund for use in the elections.

This fund seems to have been distributed among the constituencies, blocks of bills going to confidert at agents. The agents, on their part, retailed their receipts among lesser politicians and among off call who came directly in touch with the electors, and who were in a position to purchase votes. In the Fielding case a very complete picture of the process pursued is presented. To the Speaker of the Leg slature a large block of money was remitted. This high officiel divided his allowance among other men nearer to the local machine. The recipients went out into the open and the votes were purchased, w.t.n the recipients went out into the open and the votes were purchased, w.t.n the recipients went out into the open and the votes were purchased, w.t.n the recipients went out into the open and the votes were purchased, w.t.n the recipients went out into the open and the votes were purchased, w.t.n the recipients went out into the open and the votes were purchased, w.t.n the recipients went out into the open and the votes were purchased. What took place in Queen's and Shelburns was paralleled elsewhere in the province. In Halifax the popular deside to elect R. L. Borden was thwarted by the use of money, Here the Government paid high to get a great opponent out of the way. Following the Bose rpractice in the late war, it ordered that the officers on the votes were purchased to the case of the results of the resul lowing the Boer practice in the late the C. Austin Co. war, it ordered that the officers on THE ORIGIN OF GALL STONES. the other side be picked off without

of technicalities designed to avert exposure and to make the assertion of the right of the people to an hon- tracted from a species of mite is used est representation in Parliament im- in medicine as an external counteriri cossible. The Government, guilty of tant. The creature is about half possible. The Government, guilty of the attack upon the political liber-oil of a deep red color. It is only found ties of the electors, first strove to dodge the law, and then sought to the rainy season and is, hence, known set it at nought by the raising of as the rain insect. E. G. Hill contrib petty points against its administra-tion. That the technicality was not raised in vain is made clear from the fact that the member for Piotou escaped trial altogether, owing to the presentation of a fine legal point, while the two Halifax members retain their seats, although Judge Townsend has pronounced them to be the products of corruption and has advised them to resign.

The machine system in Nova Scotia is now fairly well exposed. Its influence is made apparent by the fact that when employed in provincial politics it extorted from the province, which is loyal to the Confeder ation, verdicts in favor of Mr. Fielding's policy of secession. By corruption and fraud a province which desired to remain in the union was actually led to give a decision agreeing to the break-up of the Dominion. If this system can do so great wrong in the province, what may it mot do in the Federal arena? The circumstance that it is in full operation in the Dominion field, and the fact that it employs the money of the homest people to corrupt the wavering elements and to secure popular decisions that are repudiated by the good sense of the commun ity, are conditions that must receive

the serious consideration of all men who wish their country well. The ascendency of corruption is a grave

If your spirits are low, do something; and, if you have been doing something de something different.—E. E. Hale.

The Big and Formidable Sinners Are Gray of Soul, Not Black. No paradox is it, but a demonstrable fact, that in a highly articulate society the gravest however the gravest harms are inflicted not by the worst men, but by those with vir tues enough to boost them into some coign of vantage. The boss who sells out the town and delivers the poor over to filth, disease and the powers that prey owes his chance to his engaging good fellowship and big heartedness. Some of the most dazzling careers of fraud have behind them long and reassuring records of probity, which have served to bait the trap of villainy.

Not that these decoy virtues are coun terfeit. They are, in fact, so genuine that often the stalwart sinner perseveres in the virtue that has lifted him into the high places he abuses. The legislator conscientiously returns the boodle when he finds he cannot "deliver the goods." The boss stands by his friends to his own hurt. The lobbying lawyer is faithful to his client. Jesse James' son is a full-fledged lawyer. The old man took a more crude way of getting to other people's money—but then he didn't have craft instinct to print "all the news there is."

In a word, the big and formidable sinners are gray of soul, but not black, Despatches say that the King kiss-the Kaiser on the mouth. He hald thus be able to determ ne whe-ruld thus be able to determ ne whe-town of the control o A. Ross in Atlantic.

> FIRE THE BEST FILTER. Boiling Water the Surest Way to Get

Pure Water. "All this talk about the need of filters, about people dying for lack of fil-tered water, amuses me," said a chem-

ist. "For filtered water isn't necessarily pure water. Boiled water is a hundred times better. "A filter, you see, does not free water from things dissolved in it, but only

from things floating in it. For instance, if you mix a quart of whisky in a gallon of water and then filter the mixture it will come out colorless, the floating color particles having been left behind, but this colorless fluid will be quite as capable of intoxicating you now as it was before, for none of its dissolved alcohol will have disappeared. "So with water that is polluted with sewage. All the undissolved portions of the sewage are removed by filtration and the water is left clear, tasteless and colorless, but the dissolved sewage is still present and in it may lurk bil-

lions of typhold germs.
"Let those who complain about the lack of filters just turn in and boil their water. A cent's worth of fire will purify a gallon of water better than a \$10,000,000 plant could do it."—St. Louis Globe-Democrat.

The Curious Seasickness.

"Seasickness is a curious trouble," says a physician. "It is probably due to the disturbance caused by the mo-tion of the ship to the little organs that govern the sense of equilibrium. In the inner ear are three little semicircular canals. In movement in any plane the fluid in these canals disturbs and tele-graphs the sensation to the brain, which is then able to control the balance of the whole. By the motion of a ship this delicate apparatus of the canal system is, it is suggested, thrown out of gear and wildly telegraphs wrong messages to the brain. And that pored with the nerve that controls the happenings in the region whence the trouble arises. The whole system, in brief,

Artificial Halos or "Sun Dogs." An experiment which illustrates in a very curious manner the actual philosophy of the formation of halos or "sundogs" is performed as follows: Take a solution of alum and spread a few drops of it over a pane of glass. It will readily crystallize in small, flat octohedrons, scarcely visible to the eye. When this pane of prepared glass is held between the observer and the sun or even a candle (with eyes very close will be seen three different but distinct and beautiful halos, each at a different distance from the luminous body.

Rio de Janeiro English A firm in Rio de Janeiro recently sent out the following advertisement about olive oil: "Our olives oils have garan tized of fitts quality. Diligently fabricated and filitrated. The consumer will find with them the good taste and perfect preservation. For to escape to any counterfeit is necessary to requiere on any botles this contremare deposed conformably to the law. and the boxes hare all marked with
