letter from Dr. Galbraith, of Lethbridge, from which it appears that a movemen is under way to have the Albe ta legislature take up the subjec', of pollution of streams very early in the first session. Some lysicians assert that much of the typhoid fever in different towns is due to the water and that even the big rivers are contaminated by filth from the different towns. The Calgary Herald has already pub lished the letter and remarks. As all these streams are of glacial origin this theory may be strongly combatted. The filth of Chicago's great sewer system is emptied ultimately into the Mississippi river just above St. Louis and after extensive litigation and the evidence of many specialists, learned judges decided that filth is

being exposed to the action of the elements for three miles. However Dr. Galbraith thinks differently and "where doctor's disagree who shall decide "?
