Kill the Weeds' in August.

There is no better month in which weeds generally, and the destruction of bushes, than August. It is also peculiarly a time when farmers are not so much hurried, and when the weeds have fully developed themto kill the Canada thistle, as well as selves. The farmer can see at a glance, indeed has all the season, NEW GOODS BARREL LIFTERS, the necessity of commencing the work of destruction. The best thing to be done with

Agricultural Education.

To farm profitably one must think correctly; and correct thought comes from reflection and training. It is the veriest folly to expect from the GROCERY STORE recent graduate a trained experience; but we should ask for a trained mind which can quickly receive the teachings of experience, and fit for profitable uses. We do not ask, for our part, for our colleges to graduate practical farmers; we but ask that they graduate men educated to act from principles, and to think correctly, and in whom the charms of a country life and possibilities of a farming career have taken root. When farming, practical farming, has the sympathies of an educated class of men, there is everything to be hoped. When men trained to think, and whose thought is trained to take expression in action, enter upon the arena of a farming life, the possibilities of our soil and location are to become developed to an extent 2 Cases Canadian and Scotch Tweeds, little realized. A class of educated farmers means greater opportunities for the common farmers whose education has been derived from toilsome experience and the conflict of trials. It means better and more practical lectures, more useful agricultural

PARKS' COTTON YARNS

Awarded the Only Medal Given at the Centennial Exhibition For Cotton Yarns of Canadian Manufac-ture. Nos. 5's to 10's. WHITE, BLUE, RED, ORANGE AND GREEN.

Made of Good American Cotton with great care Correctly numbered and Warranted Full Length and Weight.

We would ask the purchasers of Cotton Warp to remember that our Yarn is spun on Throstle Frames, which makes a stronger yarn than the Ring Frames, used in making American yarn.

It is also better twisted and more carefully reeled; each hank being tied up in 7 leas of 120 yards each. This make it much more easy to wind than when it is put up without leas—as the American is—and also saves a great deal of waste.

Those acquainted with weaving will understand the great advantage it is to them to use yarn put up in this manner.
